Quinn, Benjamin Westwood, 2018-05-24 This collection explores what the social and philosophical aspects of veganism offer to critical theory Bringing together leading and emerging scholars working in animal studies and critical animal studies

Thinking Veganism in Literature and Culture shows how the experience of being vegan and the conditions of thought fostered by veganism pose new questions for work across multiple disciplines. Offering accounts of veganism which move beyond contemporary conceptualizations of it as a faddish dietary preference or set of proscriptions, it explores the messiness and necessary contradictions involved in thinking about or practicing a vegan way of life. By thinking through as well as about veganism, the project establishes the value of a vegan mode of reading, writing, looking, and thinking.

Hybrid Intelligence Kevin Holt, 2025-09-17. Uniquely aimed at teams that think together to solve problems and make decisions, this book explains how to enhance the collective intelligence of a team-size group and combine it with the artificial intelligence (AI) of generative AI to create a hybrid intelligence that is smarter than either one on its own. Boards, committees, and other team-size groups of 5-20 people are the primary problem-solving and decision-making units within organizations, and they form the bridges between organizations, industries, and nations that collaborate on projects. So how can leaders exponentially improve their teams' capabilities? Assemble the right people, arm them with the right processes, and execute those processes on the right platforms, then add generative AI to enhance those practices. This book describes and synthesizes various ways of increasing a group's collective intelligence through people, process, and platform practices, and goes on to explain how to augment the practices with generative AI, including how to ask it questions and what questions to ask to obtain superior answers. The resulting upsurge in team capability enables organizations to survive and thrive in a world that is growing progressively more competitive and complex. This book will become the definitive resource for leaders and managers of commercial, government, and nonprofit organizations who want to learn how to significantly improve their teams' problem-solving and decision-making ability by increasing their collective intelligence and combining it with the artificial intelligence of generative AI.

The Learning Imperative Mark Burns, Andy Griffith, 2018-10-08. Learning is central to the long-term success of any team and is far too important to dismiss or to relegate to a nice-to-do list. In *The Learning Imperative*, bestselling authors Burns and Griffith explore the common barriers to effective learning and present a range of practical tools and strategies to help teams bring about and reap the benefits of a more positive culture around training and development. Together, they map out the key stages of the learning journey and provide a comprehensive guide for team leaders and managers who want to improve learning in their teams. They also share essential advice on the design and delivery of effective training programmes and punctuate their instruction with a range of illuminating case studies drawn from real-life contexts across the public, private, and third sectors. The book has been split into three sections. Part I sets out why creating and maintaining a learning team needs to be a high priority and provides an easy-to-use framework to help leaders establish their team's starting points. Part II is designed to assist leaders in fostering an open-to-learning mindset in their teams, offering tools to diagnose any closed-to-learning mindsets and supplying straightforward strategies to facilitate team members' development in becoming habitually reflective, curious, and responsive to feedback. The final part of the book

concerns the designing and leading of effective learning whether it is packaged within a one off session or a multi session programme and will help leaders ensure that the learning their team participates in is engaging appropriately challenging and most importantly will develop their performance Whether you are an experienced leader or just starting out in the role this user friendly manual will empower you to boost your team s performance and to make a powerful impact on their learning Two Books that I Would Recommend by Thomas Stansfield Click here to view the feature on The World of Learning s blog Click here to read the review of The Learning Imperative on Thought Space blog Radio Edutalk 18 12 2018 Mark Burns on his new book The Learning Imperative The Learning Imperative has been named the winner of the HR and Management category of The Business Book Awards 2019 The Learning Imperative has been named a finalist in the 2018 INDIES Book of the Year Awards in the business and economics category The Business Desk Authors celebrate success after business book accolade Click here to watch Mark Burns videos in relation to The Learning Imperative The Extraordinary Business Book Club Episode 167 The Learning Imperative with Mark Burns

Executive Defense Michael Useem,1993 A quiet revolution came to corporate America during the late 1980s and early 1990s Large shareholders pension funds insurance companies money managers and commercial banks exercised new found muscle pressuring senior managers to improve disappointing financial results by reshaping their organizations Michael Useem reveals how those investor pressures have transformed the inside structures of many corporations better aligning them with shareholder interests Useem draws on numerous sources including interviews with senior managers and intensive studies of seven large corporations representing a range of restructuring experiences and industries including pharmaceuticals transportation chemicals retailing and financial services He shows that organizational changes have affected many areas of corporate life headquarters staffs have been reduced authority has filtered down to operating units and compensation has become more closely tied to performance Change also extends to corporate governance where managers have fought back by seeking legal safeguards against takeovers and by staggering board terms They ve also put

significant resources into building more effective relations with shareholders As Useem demonstrates this revolution has reached beyond the corporation influencing American politics and law As increasing ownership concentration has caused companies to focus more attention on shareholders corporate political agendas have shifted from fighting government regulation to resisting shareholder intrusion This book will be important reading for managers economists lawyers financial analysts and all observers of American business **New Breeder's Gazette** ,1890 **The Breeder's Gazette** ,1890
