examined and compared with more recently grown woods available to current makers The role of varnish in the appearance and acoustics of the final instrument is also discussed since it has often been proposed as a secret ingredient used by great makers Aspects related to strings are commented As well as discussing these subjects with many illustrations from classical and contemporary instruments the book gives attention to conservation and restoration of old instruments and the physical results of these techniques There is also discussion of the current value of old instruments both for modern performances and as works of art having great monetary value The book will be of interest and value to researchers advanced students music historians and contemporary string instrument makers Musicians in general particularly those playing string instruments will also find its revelations fascinating It will also attract the attention of those using wood for a variety of other purposes for its use in musical instruments uncovers many of its fundamental features Professor Neville H Fletcher Australian National University Canberra
