

Paper 1

The Challenge of Natural Hazards

1	Use named examples to show how the effects and responses to a natural hazard vary between two areas of contrasting levels of wealth.	
2	Use a named example of a tropical storm to show its effects and responses.	
3	An example of a recent extreme weather event in the UK to illustrate: • causes • social, economic and environmental impacts • how management strategies can reduce risk	

The Living World

1	An example of a small scale natural ecosystem to illustrate the concept of interrelationships within a natural system, an understanding of producers, consumers, decomposers, food chains, food webs and nutrient cycling.	
2	A case study of a tropical rainforest to illustrate: • causes of deforestation - subsistence and commercial farming, logging, road building, mineral extraction, energy development, settlement, population growth • impacts of deforestation - economic development, soil erosion, contribution to climate change	
Either	A case study of a hot desert to illustrate: • development opportunities in hot desert environments: mineral extraction, energy, farming, tourism • challenges of developing hot desert environments: extreme temperatures, water supply, land availability	
Or	A case study of a cold environment to illustrate: • development opportunities in cold environments: mineral extraction, energy, fishing and tourism • challenges of developing cold environments: extreme temperatures, inaccessibility, protection of buildings and infrastructure	

River Landscapes in the UK

1	An example of a section of coastline in the UK to identify its major landforms of erosion and deposition.	
2	An example of a flood management scheme in the UK to show: • why the scheme was required • the management strategy • the social, economic and environmental issues	

Coastal Landscapes in the UK

1	An example of a river valley in the UK to identify its major landforms of erosion and deposition.	
2	An example of a coastal management scheme in the UK to show: • the reasons for management • the management strategy • the resulting effects and conflicts	

Paper 2

Resource Management – Food

1	An example of a large-scale agricultural development to show how it has both advantages and disadvantages.	
2	An example of a local scheme in an LIC or NEE to increase sustainable supplies of food.	

Urban Issues and Challenges

1	A case study of a major city in an LIC or NEE to illustrate: • the location and importance of the city, regionally, nationally and internationally • causes of growth: natural increases and migration • how urban growth has created opportunities: • social: access to services - health and education; access to resources - water supply, energy • economic: how urban industrial areas can be a stimulus for economic development • how urban growth has created challenges: • managing urban growth - slums, squatter settlements • providing clean water, sanitation systems and energy • providing access to services - health and education • reducing unemployment and crime • managing environmental issues - waste disposal, air and water pollution, traffic congestion	
2	An example of how urban planning is improving the quality of life for the urban poor.	
3	A case study of a major city in the UK to illustrate: • the location and importance of the city in the UK and the wider world • impacts of national and international migration on the growth and character of the city • how urban change has created opportunities: • social and economic: cultural mix, recreation and entertainment, employment, integrated transport systems • environmental: urban greening • how urban change has created challenges: • social and economic: urban deprivation, inequalities in housing, education, health and employment • environmental: deprivation, building on brownfield and greenfield sites, waste disposal • the impact of urban sprawl on the rural/urban fringe, and the growth of satellite settlements	
4	An example of an urban regeneration project to show: • reasons why the area needed regeneration • the main features of the project	

The Changing Economic World

1	An example of how the growth of tourism in an LIC or NEE helps to reduce the development gap.	
2	A case study of one LIC or NEE to illustrate: • the location and importance of the country, regionally and globally • the wider political, social, cultural and environmental context within which the country is placed • the changing industrial structure. The balance between different sectors of the economy. How manufacturing industry can stimulate economic development • the role of transnational corporations (TNCs) in relation to industrial development. Advantages and disadvantages of TNCs to the host country • the changing political and trading relationships with the wider world • international aid: types of aid, impacts of aid on the receiving country • the environmental impacts of economic development • the effects of economic development on quality of life for the population	
3	An example of how modern industrial development can be more environmentally sustainable.

Study Studies Eog Release:

Hormones, Brain and Behavior Online ,2002-06-18 Hormones Brain and Behavior Second Edition is a comprehensive work discussing the effect of hormones on the brain and subsequently behavior This major reference work has 109 chapters covering a broad range of topics with an extensive discussion of the effects of hormones on insects fish amphibians birds rodents and humans To truly understand all aspects of our behavior we must take every influence including the hormonal influences into consideration Donald Pfaff and a number of well qualified editors examine and discuss how we are influenced by hormonal factors offering insight and information on the lives of a variety of species Hormones Brain and Behavior offers the reader comprehensive coverage of growing field of research with a state of the art overview of hormonally mediated behaviors This reference provides unique treatment of all major vertebrate and invertebrate model systems with excellent opportunities for relating behavior to molecular genetics The topics cover an unusual breadth from molecules to ecophysiology ranging from basic science to clinical research making this reference of interest to a broad range of scientists in a variety of fields Available online exclusively via ScienceDirect A limited edition print version is also available Comprehensive coverage of a growing field of research Unique treatment of all major vertebrate and invertebrate model systems with excellent opportunities for relating behavior to molecular genetics Covers an unusual breadth ranging from molecules to ecophysiology and from basic science to clinical research

Encyclopedia of Food Allergy ,2024-06-21 Encyclopedia of Food Allergy organized in 10 sections with 200 chapters and written by world renowned clinician scientist authors is the most comprehensive resource for food allergy ever compiled With online and physical presence intuitive and easily accessible organization of information the reader can quickly access overview and general topics as well as detailed information to inform solutions to clinical or research questions Research topics provide the necessary background for the novice as well as the details required for those in the field Clinical topics provide comprehensive and practical information with generous use of tables figures and key points clinical pearls to inform clinical decision making and promote evidence based management decisions Food allergy may affect up to 10% of the population in developed countries and appears to be increasing in prevalence worldwide with many food allergies proving life long severe and potentially fatal The last decade has witnessed a sea change response to the impact of food allergy through basic science research on the immunology food science research on the triggers clinical approaches to daily management treatment and prevention and an increasing understanding of the psychosocial and societal implications and how to address them With the expanding breadth and depth of the field there is no existing comprehensive resource available for those professionals interested in learning about or contributing to food allergy research and clinical care This is a complete resource covering broad and detailed aspects of food allergy and adverse food reactions for clinicians researchers regulators food industry students and other stakeholders who need and will benefit from a rich resource with in depth and practical information Presents in depth comprehensive

coverage from an outstanding international author base of domain experts Ideal for new researchers and clinicians who will have a single resource that includes general topics to get them started Includes access to detailed information in their areas of work AND for many related topics that will help improve their research or clinical care **Sleep Research** ,1995 *The Physiology of Fishes* David H. Evans,James B. Claiborne,Suzanne Currie,2013-11-25 Following the success of the bestselling third edition this newly updated and completely revised fourth edition of *The Physiology of Fishes* provides comprehensive coverage of the most important aspects of the form and function of fishes It covers the most recent advances as well as fundamental subjects such as cardiovascular physiology intestinal transport and gill ion uptake Written by an international group of experts this book contains fresh approaches with completely new treatment of the original topics and the addition of new chapters Muscle plasticity Membranes and Metabolism Oxygen Sensing Endocrine Disruption Pain Perception Cardiac Regeneration Neuronal Regeneration Two decades after the publication of the first edition this book remains the only published single volume work on fish physiology Each chapter contains an extensive bibliography providing readers with the best sources from the primary literature The fourth edition provides an important reference for aquatic biologists ichthyologists fisheries scientists and comparative physiologists **Third International Symposium on Reproductive Physiology of Fish** Memorial University of Newfoundland. Marine Sciences Research Laboratory,1987 **Hormones and Reproduction of Vertebrates, Volume 1** David O. Norris,Kristin H. Lopez,2024-07-17 *Hormones and Reproduction of Vertebrates Volume 1 Fishes* is the first of five second edition volumes representing a comprehensive and integrated overview of hormones and reproduction in fishes amphibians reptiles birds and mammals The book includes coverage of endocrinology neuroendocrinology physiology behavior and anatomy of fish reproduction It provides a broad treatment of the roles of pituitary thyroid adrenal and gonadal hormones in all aspects of reproduction as well as descriptions of major life history events New to this edition is a concluding assessment of the effect of environmental influences on fishes Initial chapters in this book broadly examine sex determination reproductive neuroendocrinology stress and hormonal regulation as it relates to testicular and ovarian development and function Subsequent chapters examine hormones and reproduction of specific taxa including agnathan chondrichthyan and sarcopterygian fishes The book concludes with an examination of the environmental influences on hormones and reproduction of fishes including endocrine disrupting chemicals and climate change *Hormones and Reproduction of Vertebrates Volume 1 Fishes* is designed to provide a readable coordinated description of reproductive basics in fishes as well as an introduction to the latest trends in reproductive research and a presentation of our understanding of reproductive events gained over the past decade It may serve as a stand alone reference for researchers and practitioners in the field of ichthyology or as one of five coordinated references aligned to provide topical treatment across vertebrate taxa for researchers practitioners and students focused on vertebrate endocrinology Covers endocrinology neuroendocrinology physiology behavior and anatomy of fish reproduction Includes

pituitary pineal thyroid adrenal and gonadal hormones Focuses on teleosts as well as information on agnathan
 chondrichthyan and sarcopterygian fishes Provides new coverage on endocrine disrupting chemicals microplastics and

Connexins or Pannexins: Focus on the Nervous System Juan Andrés Orellana,2016-09-26 Given that the extremely
 elaborated and dynamic functions performed by the nervous system require the close synchronization of brain cells complex
 organisms have developed different mechanisms of intercellular communication At this regard paracrine signaling between
 neighboring cells is currently recognized as one of the most widely distributed mechanisms of synchronization in the brain
 parenchyma In mammals paracrine signaling is in part mediated by single membrane channels formed by connexins
 connexons hemichannels or pannexins pannexons which are two different membrane protein families composed of about 20
 and 3 members respectively Single membrane channels formed by these proteins serve as aqueous pores permeable to ions
 and small molecules allowing the diffusional exchange between the intra and extracellular milieu Thus connexin
 hemichannels and pannexons permit the release of significant quantities of autocrine paracrine signaling molecules e g ATP
 glutamate NAD adenosine and PGE2 into the extracellular milieu as well as the uptake of small molecules An increasing body
 of evidence has revealed that connexin hemichannels and pannexons play a crucial role in a plethora of brain processes
 including blood flow regulation Ca²⁺ wave propagation memory consolidation glucose sensing and cell migration and adhesion
 Considering the multiple cell signaling functions of these channels their dysregulation is proposed not only as potential
 pathological biomarker but it has been implicated in the pathogenesis and progression of diverse brain diseases e g
 meningitis Alzheimer s disease and stroke The aim of this Research Topic is to gather a collection of original research articles
 method protocols short communications opinions perspectives as well as review articles providing the latest progress and
 insights in the field of connexin hemichannels and pannexons in the nervous system Within this volume we plan to cover from
 basic research including channel structure regulation pharmacology and trafficking to different biological functions in the
 physiology behavior plasticity neurogenesis blood flow control neuron glia crosstalk cell migration and differentiation as well
 as in the pathophysiology neuroinflammation mutation related diseases glial dysfunction and neurodegeneration of the
 nervous system We hope that this collection of articles will serve to understand how the signaling of connexin hemichannels
 and pannexons influences both normal and pathological brain function *Journal of Shellfish Research* ,1999 Advances
in Sleep Research ,1981 *The United States Catalog* Ida M. Lynn,1928 *Society for Neuroscience Abstracts* Society for
