### Open Access Training Plan

This program is subject to the maximum contribution of the 10% (Twenty Percent) program, it is not subject to a minimum contribution.

[illegible]

The proposed investigation is a 2 (treatment)  $\times$  2 (gender)  $\times$  2 (age) experimental design. The study will involve 120 participants, 60 males and 60 females, aged 18-25, who will be randomly assigned to one of two treatment groups: a control group and an experimental group. The control group will receive a standard intervention, while the experimental group will receive a modified intervention. The study will be conducted over a period of 12 weeks, with data collection occurring at baseline, 4 weeks, 8 weeks, and 12 weeks. The primary outcome measure is the change in the level of the dependent variable, which is a measure of the construct being studied. The study will be conducted in a controlled environment, and all procedures will be approved by the appropriate ethics committee.

Because this study was the first to examine the operation of a possible mechanism to high athletic potential to learn, the current authors' limited knowledge and experience with the domain

The program team was highly well organized, bringing considerable experience to the project team. During the course of the workshop key elements (i.e. strengths, needs, opportunities, resources, current workloads, and the evaluation approach) were clearly articulated around the three critical right people and effort/along the three outcomes with some form of ownership plan.

Right through that time is a follow-up on the Operation Pilipec program you heard so much about. And, there were several other programs.

Follow-on Development of Structured Training for the Close Combat Tactical Trainer

, 1998 This report describes the work done on the Structured Training for Units in the Close Combat Tactical Trainer 2 (STRUCCTT 2) Project, a follow-on to the STRUCCTT Project. The purposes of this project were to develop additional exercises for inclusion in the initial training support packages (TSPs) and to develop an orientation course TSP and exercises which are necessary to support the Close Combat Tactical Trainer (CCTT) complete system fielding. This report first summarizes the background, the use of structured simulation-based training in CCTT, and identifies the technical objectives for the project. The development section discusses the processes used to create the TSPs. The formative evaluation section details the project evaluation strategy and method and includes a description of exercise and TSP testing and modification. Following this segment, the lessons learned, present issues regarding this project's processes and product development, which provide insight and direction for additional development work. The final section of the report contains a discussion of recommendations for future TSP development.
