World History Shorts 2 The Cold War:

Teaching History with Newsreels and Public Service Shorts Aaron Gulyas, 2017-01-26 Popular media has become a common means by which students understand both the present and the past. Consequently more teachers are using various forms of popular culture as pedagogical tools in the history classroom. Among the many materials available to teachers in the digital age are public domain films produced throughout the twentieth century. These include studio made newsreels, government produced war propaganda, corporate sponsored cartoons, and public health shorts that show teens everything from the perils of cheating to the dangers of pre marital sex. **Teaching History with Newsreels and Public Service Shorts** is a guide for teaching U S and world history. In addition to introducing teachers of history to the wide range of short films available for classroom use, this volume provides sample lesson plans, assessment activities, and discussion guides. This book will also help teachers make appropriate selections that convey how a particular newsreel or short reflects the period in which it was made. Providing tips for how to use these materials to develop historical knowledge, critical thinking, and media literacy, **Teaching History with Newsreels and Public Service Shorts** is an invaluable asset to any teacher of history in middle and secondary school settings, as well as at the undergraduate level. **World War II and the Cold War** Martin J. Medhurst, 2018-09-01 This volume examines crucial moments in the rhetoric of the Cold War, beginning with an exploration of American neutrality and the debate over entering World War II. Other topics include the long distance debate carried on over international radio between Hitler and Franklin D. Roosevelt, understanding and interpreting World War II propaganda, domestic radio following the war, and the use of Abraham Lincoln narratives as vehicles for American propaganda, the influence of foreign policy agents Dean Acheson, Paul Nitze, and George Kennan, and the rhetoric of former presidents John F. Kennedy and Ronald Reagan. Ultimately, this volume offers a broad based look at the rhetoric framing the Cold War, and in doing so, offers insight into the political climate of today. ***Animation: A World History*** Giannalberto Bendazzi, 2015-10-23 A continuation of 1994's groundbreaking *Cartoons*, Giannalberto Bendazzi's *Animation: A World History* is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often neglected areas, and introducing over fifty previously undiscovered artists. Full of first hand, never before investigated, and elsewhere unavailable information, *Animation: A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume II delves into the decades following the Golden Age, an uncertain time when television series were overshadowing feature films, art was heavily influenced by the Cold War, and new technologies began to emerge that threatened the traditional methods of animation. Take part in the turmoil of the 1950s through 90s as American animation began to lose its momentum, and the advent of television created a global interest in the art form. With a wealth of new research, hundreds of photographs and film stills, and an easy to navigate organization, this book is essential.

terms of intelligence as well as the specific forms of testing being used Ideas of the gifted child also reshaped family lives parents dedicated time to providing special leisure spaces for those thought of as gifted running them in their own homes and taking their children significant distances to spend time with others that were also gifted Voluntary organisations were critical here as the network through which young people and adults encountered the term gifted and lived and created it relationally through interactions with one another Voluntary organisations looking to gain attention and visibility also critically shaped the idea that the gifted young were elites of the future central to answering challenges of economic decline global warfare or humanitarian aid The hopes placed on gifted children between the 1960s and the 1990s were often sky high yet many gifted young still felt that the community wasted their talents and did not support them This book then provides new perspectives on the tensions between elitism and equality in modern Britain It also offers vivid stories of optimism hope disappointment and criticism in which young people themselves play a central role

War and Press Freedom Jeffery A. Smith, 1999-02-25 War and Press Freedom The Problem of Prerogative Power is a groundbreaking and provocative study of one of the most perplexing civil liberties issues in American history What authority does or should the government have to control press coverage and commentary in wartime First Amendment scholar Jeffery A Smith shows convincingly that no such extraordinary power exists under the Constitution and that officials have had to rely on claiming the existence of an autocratic higher law of survival Smith carefully surveys the development of statutory restrictions and military regulations for the news media from the ratification of the Bill of Rights in 1791 through the Gulf War of 1991 He concludes that the armed forces can justify refusal to divulge a narrow range of defense secrets but that imposing other restrictions is unwise unnecessary and unconstitutional In any event as electronic communication becomes almost impossible to constrain soldiers and journalists must learn how to respect each other's obligations in a democratic system
