admired by so many What gives him the uncanny ability to speak with young people in language familiar to them In this book John Raymaker and Gerry Gruzden explore the life and writings of Pope Francis which have a prophetic visionary ability to speak to important issues of the day The authors evaluate how Pope Francis encounters with religious leaders of other faiths have broken new ground to help unite mankind They reach back into Christian history to explore the teachings of such Catholic mystics as Thomas Merton while also delving into the beliefs of Islamic and Buddhist mystics to demonstrate how well the pope is in touch with a spirituality that can speak to those seeking the truth In its final chapters the book examines how the pope endorses the work of Christians who live their faith in small Christian communities and reveals how such communities can strengthen parish life in various parts of the world Like St Francis his namesake and like Teilhard de Chardin before him the pope has an appropriate vision to rebuild God s Church in a transitional age His writings have focused on caring for the earth and preaching the good news of the gospels in a way that and allows him to reach young people in need of joy as they face an uncertain future He is the Conscience of the World Illustrated Encyclopedia of Gold and Silver Coins of the World A. mechanists are in the main concerned solely with epistemological questions But the author argues their most central claims rely on metaphysical assumptions Thus they must also take into account metaphysics a system of thought concerned with explaining the fundamental nature of being and the world around it This branch of philosophy does indeed matter to the empirical sciences The chapters investigate the nature of mechanisms their components and the ways in which they can bring about different phenomena In addition the author develops a novel account of causation in terms of activities The analysis provides the basis for many further research projects on mechanisms and their relations to for example the mind body problem realization multiple realization natural kinds causation laws of nature counterfactuals and scientific levels
