goods was accompanied by a proliferation of retail spaces and techniques which brought new fashions and imported commodities to the homes of consumers Governments responded to a growing culture of polite and civilized behavior across society by stimulating urban renewal for leisure and shopping new pavements street lighting green promenades theatres coffee houses and adjacent shopping streets were laid out everywhere in Europe As the 18th century drew to its close shopping had become a publicly accepted and celebrated leisure pursuit gaining its proper meaning in multiple languages A Cultural History of Shopping in the Age of Enlightenment presents an overview of the period with themes addressing practices and processes spaces and places shoppers and identities luxury and everyday home and family visual and literary representations reputation trust and credit and governance regulation and the state *Archaeology, Annales, and Ethnohistory* A. Bernard Knapp, 1992-04-16 This collection considers the relevance of the Annales school for archaeology The Annales movement regarded orthodox history as too much concerned with events too narrowly political too narrative in form and too isolated from neighbouring disciplines Annalists attempted to construct a total history dealing with a wide range of human activity and combining divergent material documentary and theoretical approaches to the past Annales oriented research utilizes the techniques and tools of various ancillary fields and integrates temporal spatial material and behavioural analyses Such an approach is obviously attractive to archaeologists for even though they deal with material data rather than social facts they are just as much as historians interested in understanding social economic and political factors such as power and dominance conflict exchange and other human activities Three introductory essays consider the relationship between Annales methodology and current archaeological theory Case studies draw upon methodological variations of the multifaceted Annales approach The volume concludes with two overviews one historical and the other archaeological **The SAGE Handbook of Globalization** Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their expertise in global terms The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier's forthcoming Encyclopaedia of Global Studies with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to

researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core global concerns of narrative praxis space and place This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century
