

Decline in Agriculture A decline in agriculture also weakened the empire. Traditional rules and customs farmers obeyed had become difficult to follow due to constant warfare and invasion. As a result, harvests grew increasingly poor.

The use of slaves also affected the problem. Like other wealthy households, many the Roman aristocrat classes, the slaves were throughout farms in the Roman provincial classes. The use of slaves was common who were forced to work in the fields. The use of slaves also discouraged improvements in technology that might have improved farming. As Roman agriculture declined, farmers and farmers' support for the government declined.

Military and Political Problems Eventually, Rome's great military machine began showing signs of weakness. Over time, Roman soldiers in general became less disciplined and loyal. They glorified soldiers in general because they were paid and loved. They glorified that soldiers are to have, but a disciplined military leaders feelings of leaders eventually declined among average citizens. As well, as the great Roman empire began to grow increasingly corrupt, public affairs began to become less important in financial gain than in public. Therefore, because more citizens in financial gain than in public affairs, as a result, more citizens lost their sense of pride in the government. They no longer showed a willingness to sacrifice for the good of Rome.

CONNECTION How do military and political problems weaken the empire?

Rome Divides into East and West

ESSENTIAL QUESTION What changes did Rome undergo?

Despite all its difficulties, the Roman Empire continued on for another 200 years. This was due in part to the strong leadership of two emperors: Diocletian (284–305) and Constantine.

Power Shifts East Diocletian became the leader of Rome in 284. He moved east to the empire for ruling with an iron fist and increasing his reputation. In addition, he took the bold step of dividing the empire into east and west as a way of making Rome's enormous territory easier to govern.

Constantine succeeded Diocletian as emperor and took even steps of great significance. The first occurred in 313, when he also issued an edict to all Christians in the empire. By allowing Christians to worship freely, he played a key role in Christianity's growth.

Constantine's second significant action came in 324. He moved the capital of the empire from Rome to the Greek city of

Byzantium (later Constantinople), which later became known as Constantinople. The new capital signaled a shift in power from the western part of the empire to the east.

CONNECTION What key changes did Constantine make to Rome?

Fall of the Roman Empire

ESSENTIAL QUESTION What brought about the fall of Rome?

In addition to internal difficulties, the Romans faced another major problem. Foreign groups were encroaching all around Rome's borders, from the north, south, and the empire's shore borders would soon turn into a rapid downfall.

CRITICAL THINKING
How do you think the Roman Empire fell?
page 175

Invasion and Conquest A number of Germanic groups and other groups lived beyond Rome's borders. During the last 300 years, these groups began pushing into Roman lands. Their reasons for invading varied. Some came looking for better land or to join in Rome's wealth. Many others were fleeing a fierce group of invaders from Asia known as the Huns. Eventually, the Huns themselves would invade the empire. In 476, Germanic tribes conquered Rome. It was this date, according to most scholars, that marks the fall of the Western Roman Empire.
