Schuchman,2024-11-25 Older adults are living longer with more chronic disease and functional impairment than at any other time in history Office based practice is inadequate to meet the needs of patients who have difficulty leaving their homes for routine or urgent visits and health care clinicians must choose between trying to manage their problems via telehealth or sending them to the emergency room via ambulance Indeed many clinicians receive little or no training in home based medical care and are unable to consider a home visit that might avert a health crisis or an emergency room visit Other clinicians know that house calls are possible but may not know how to work them into day to day practice In recent years a growing number of clinicians have focused their practice on home based medical care to meet the rising need In fact there has been a substantial increase in house calls provided to Medicare beneficiaries In 2023 over 750 000 traditional Medicare beneficiaries and in 2022 over 680 000 Medicare Advantage beneficiaries received longitudinal home based medical care While the number of house calls has increased rapidly the number of clinicians providing those visits has markedly decreased suggesting that clinicians who are providing such care are making it the sole focus of their practice This book is intended to be a practical reference for any clinician who has struggled to care for an older adult who has difficulty getting to the office By describing fundamental principles of geriatric house call medicine and application to specific diseases and conditions we hope to provide clinicians with the tools they need to provide timely compassionate and high quality care for their older adult patients The second edition has been updated to reflect changes in the healthcare system and approaches to care since the publication of the first edition *Essential Enrolled Nursing Skills for Person-Centred Care* Gabby Koutoukidis,Kate Stainton,2016-09-01 The Essential Enrolled Nursing Skills for Person Centred Care 1st edition workbook is an indispensable tool that will assist students in mastering the clinical skills required to deliver the highest quality care Specifically developed to support Tabbner s Nursing Care Theory and Practice 7th edition the workbook features the essential skills that form part of the assessment for Diploma of Nursing students Based on evidence based practice each skill features a step by step approach and rationale to help understanding of how and why a skill is performed Directly aligned to Tabbner s Nursing Care Theory and Practice 7th edition All skills and competency checklists align to the new 2016 Enrolled Nurse Standards for Practice and the HLT Health Training Package Competency checklists feature the Bondy Rating Scale providing a valuable
