energy

Organisms obtain energy in a process called (1) cellular respiration. This process harvests electrons from carbon compounds, such as (2) glucose, and uses that energy to make (3) ATP. ATP is used to provide (4) energy for cells to do work. In (5) Glycolysis, glucose is broken down into pyruvate. Glycolysis is a(n) (6) anaerobic process because it does not require oxygen. Glycolysis takes place in the (7) cytoplasm. Two molecules of ATP and two molecules of (8) NADH are formed for every glucose molecule that is broken down. (9) aerobic respiration takes place in the (10) mitochondria. It is aerobic because the process requires (11) oxygen.

**The Role of Communication in Learning To Model** Paul Brna, Michael

Baker, Keith Stenning, Andree Tiberghien, 2014-05-12 In this book a number of experts from various disciplines take a look at three different strands in learning to model They examine the activity of modeling from disparate theoretical standpoints taking into account the individual situation of the individuals involved The chapters seek to bridge the modeling of communication and the modeling of particular scientific domains In so doing they seek to throw light on the educational communication that goes on in conceptual learning Taken together the chapters brought together in this volume illustrate the diversity and vivacity of research on a relatively neglected yet crucially important aspect of education across disciplines learning to model A common thread across the research presented is the view that communication and interaction as

fundamental to most educational practices and as a repository of conceptual understanding and a learning mechanism in itself is intimately linked to elaborating meaningful coherent and valid representations of the world The editors hope this volume will contribute to both the fundamental research in its field and ultimately provide results that can be of practical value in designing new situations for teaching and learning modeling particularly those involving computers
