Tolabi, 2015-04-13 In the 21st century electric power engineering is going green and smart In this century the increasing
search for the efficiency the computational continuous improvement and the development of new effective mathematical
methods are three impelling forces for the utilization of optimization in electric power systems Nowadays it is unlikely to find
an electric company that does not use optimization methods This kind of processes is utilized in both planning and operation
calculations for the generation transmission and distribution areas of power systems Electrical engineers face these new
operational methods in some cases without the adequate preparation This book aims to include some of the present and
foreseen applications of the optimization in electric power systems explained by main experts in the field Furthermore this
book may serve as state of the art for undergraduate and graduate students worldwide **Switchgear and protection**
