Parallel and High-Performance Computing in Artificial Intelligence Mukesh Raghuwanshi,Pradnya Borkar,Rutvij H. Jhaveri,Roshani Raut,2025-05-20 Parallel and High Performance Computing in Artificial Intelligence explores high performance architectures for data intensive applications as well as efficient analytical strategies to speed up data processing and applications in automation machine learning deep learning healthcare bioinformatics natural language processing NLP and vision

intelligence The book's two major themes are high performance computing HPC architecture and techniques and their application in artificial intelligence Highlights include HPC use cases application programming interfaces APIs and applications Parallelization techniques HPC for machine learning Implementation of parallel computing with AI in big data analytics HPC with AI in healthcare systems AI in industrial automation Coverage of HPC architecture and techniques includes multicore architectures parallel computing techniques and APIs as well as dependence analysis for parallel computing The book also covers hardware acceleration techniques including those for GPU acceleration to power big data systems As AI is increasingly being integrated into HPC applications the book explores emerging and practical applications in such domains as healthcare agriculture bioinformatics and industrial automation It illustrates technologies and methodologies to boost the velocity and scale of AI analysis for fast discovery Data scientists and researchers can benefit from the book's discussion on AI based HPC applications that can process higher volumes of data provide more realistic simulations and guide more accurate predictions The book also focuses on deep learning and edge computing methodologies with HPC and presents recent research on methodologies and applications of HPC in AI

Computer Vision and Machine Learning in Agriculture Mohammad Shorif Uddin, Jagdish Chand Bansal, 2021-03-23 This book discusses computer vision a noncontact as well as a nondestructive technique involving the development of theoretical and algorithmic tools for automatic visual understanding and recognition which finds huge applications in agricultural productions It also entails how rendering of machine learning techniques to computer vision algorithms is boosting this sector with better productivity by developing more precise systems Computer vision and machine learning CV ML helps in plant disease assessment along with crop condition monitoring to control the degradation of yield quality and severe financial loss for farmers Significant scientific and technological advances have been made in defect assessment quality grading disease recognition pests insects fruits and vegetable types recognition and evaluation of a wide range of agricultural plants crops leaves and fruits The book discusses intelligent robots developed with the touch of CV ML which can help farmers to perform various tasks like planting weeding harvesting plant health monitoring and so on The topics covered in the book include plant leaf and fruit disease detection crop health monitoring applications of robots in agriculture precision farming assessment of product quality and defects pest insect fruits and vegetable types recognition
