Advanced Age Geriatric Care Nages Nagaratnam,Kujan Nagaratnam,Gary Cheuk,2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4 3 million to 9 6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older

persons are healthier today than their counterparts decades ago More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management

Exploration and Production of Oceanic Natural Gas Hydrate Michael D. Max, Arthur H. Johnson, 2018-10-24 This second edition provides extensive information on the attributes of the Natural Gas Hydrate NGH system highlighting opportunities for the innovative use and modification of existing technologies as well as new approaches and technologies that have the potential to dramatically lower the cost of NGH exploration and production Above all the book compares the physical environmental and commercial aspects of the NGH system with those of other gas resources It subsequently argues and demonstrates that natural gas can provide the least expensive energy during the transition to and possibly within a renewable energy future and that NGH poses the lowest environmental risk of all gas resources Intended as a non mathematical descriptive text that should be understandable to non specialists as well as to engineers concerned with the physical characteristics of NGH reservoirs and their production the book is written for readers at the university graduate level It offers a valuable reference guide for environmentalists and the energy community and includes discussions that will be of great interest to energy industry professionals legislators administrators regulators and all those concerned with energy options and their respective advantages and disadvantages

The Fabrica of Andreas Vesalius Dániel Margócsy, Mark Somos, Stephen N. Joffe, 2018-05-23 Winner of the Third Neu Whitrow Prize 2021 granted by the Commission on Bibliography and Documentation of IUHPS DHST Additional background information This book provides bibliographic information ownership records a detailed worldwide census and a description of the handwritten annotations for all the surviving copies of the 1543 and 1555 editions of Vesalius De humani corporis fabrica

It also offers a groundbreaking historical analysis of how the *Fabrica* traveled across the globe and how readers studied, annotated and critiqued its contents from 1543 to 2017. The *Fabrica* of Andreas Vesalius sheds a fresh light on the book's vibrant reception history and documents how physicians, artists, theologians and collectors filled its pages with copious annotations. It also offers a novel interpretation of how an early anatomical textbook became one of the most coveted rare books for collectors in the 21st century.

Progress in Geography Skills: Key Stage 3 David Gardner, 2020-05-29 Highly Commended in the GA Publishers Awards 2021. This comprehensive resource has been designed to work alongside *Progress in Geography* and uses the same format and recognisable layout. It can also be used as a standalone text and is packed full of resources, well-framed activities, support and practice to help students to develop key geographical skills and think critically about what they're learning. The judges also felt it could be a useful reference for non-specialists and trainee teachers. This book is designed to help students build up and apply geographical skills throughout KS3. A wide range of skills are introduced in Unit 1 and then revisited and progressed in different contexts in Units 2-15 as part of a learning journey to becoming a geographer. These skills are progressed as an integral component of an enquiry process. The book provides a firm foundation for the geographical skills required at GCSE level and beyond. A wide range of geographical data is provided, including satellite images and a large number of OS maps at a variety of scales, often linked to other data such as ground and aerial photos. *Progress in Geography Skills: Key Stage 3* can be used independently or alongside the *Progress in Geography: Key Stage 3 Student Book*. Each page has a specific learning objective and skills focus, such as: Conducting geographical enquiries, considering different points of view and making decisions; Drawing field sketches linked to OS maps and locating places using lines of latitude and longitude on an atlas or grid; references on OS maps; Understanding and drawing a wide variety of graphs; Analysis and presentation of statistical data; Comparing ground level photographs with Ordnance Survey maps and being able to identify coastal, glacial and river landforms on OS maps; Using newspapers to investigate issues and detect bias; Using websites, including online GIS, as part of enquiries and investigating data.

Ageing and Effecting Long-term Care in China Sabrina Ching Yuen Luk, Hui Zhang, Peter Pok-Man Yuen, 2021-12-19. Recognizing rapidly ageing population is one key concern faced by cities and the challenge it would present to healthcare system, this book looks at ageing in China's population as well as the delivery and financing of long-term care (LTC) in China. The book compares key features of long-term care insurance (LTCI) schemes in 15 pilot cities and evaluates the sustainability of various financing models adopted by the cities in the LTCI schemes. The book uses an interpretive case study approach to give an in-depth look into the LTC models in three pilot cities: Qingdao, Nantong and Shanghai. The three cities represent three different models of financing and delivering LTC. To assess how effective the LTC models in these three cities are, the book uses five criteria, including utilization of medical resources, cost, equity, quality of care and sustainability. Also, the authors discuss how the financing and delivery of LTC can be improved in China, the impact of the 2019 coronavirus (COVID-19) pandemic on older adults in need of LTC in the

country and the implications of China's LTCI reform for other countries The book will be a useful reference to scholars and policy makers who look at urban ageing and healthcare costs and delivery **Multicultural Health** Miranda Sue
