LUBRICATION

The power head is lubricated by oil mixed with the fuel. Fuel:oil ratios should be 30:1 during break-in of a new or rebuilt engine and 50:1 for normal service when using a NMMA certified two-stroke engine oil or Suzuki "OCI" oil. When using any other type of two-

stroke engine oil, fuel:oil ratios should be 20:1 during break-in and 30:1 for normal service. Manufacturer recommends regular or no-lead automotive gasoline having an 85-95 octane rating. Gasoline and oil should be thoroughly mixed.

The lower unit gears and bearings are lubricated by oil contained in the gear-

case. SAE 90 hypoid outboard gear oil is recommended. Oil capacity of gearcase with integral exhaust outlet in the lower housing is approximately 220 mL. Oil capacity of gearcase with through-the-propeller exhaust is approximately 200 mL. Reinstall vent and fill plugs securely using a new gasket, if necessary, to ensure a water tight seal.
