Alan Watts - In the Academy Alan Watts, 2017-04-25 Explores language and mysticism Buddhism and Zen Christianity comparative religion psychedelics and psychology and psychotherapy To commemorate the 2015 centenary of the birth of Alan Watts 1915-1973 Peter J Columbus and Don Adrian L Rice have assembled a much needed collection of Watts's scholarly essays and lectures Compiled from professional journals monographs scholarly books conferences and symposia proceedings the volume sheds valuable light on the developmental arc of Watts's thinking about language and mysticism Buddhism and Zen Christianity comparative religion psychedelics and psychology and psychotherapy This definitive collection challenges Watts's reputation as a popularizer or philosophical entertainer revealing his concerns to be much more expansive and transdisciplinary than is suggested by the parochial Zen Buddhist label commonly affixed to his writings The editors' authoritative introduction elucidates contemporary perspectives on Watts's life and work and supports a bold rethinking of his contributions to psychology philosophy and religion This excellent volume is important in establishing Watts as perhaps the most important Western thinker and writer on Eastern religions and philosophy as well as comparative religions of the twentieth century John W Traphagan author of *Rethinking Autonomy: A Critique of Principlism in Biomedical Ethics* Nalanda Mahavihara Mary L. Stewart, 2018-01-01 From the 1860s substantial ruins in the Indian state of Bihar identified as Nalanda Mahavihara were of scholarly interest because the monastery was mentioned in the travel accounts of seventh century Chinese monks From 1916 until 1938 the Archaeological Survey of India systematically excavated documented illustrated and gave continuity to the site However ASI historic procedures were severely criticized in the 1940s The ASI was reorganized and reoriented to modern scientific methods No new excavation took place at the site until 1973 Between 1973 and 1983 the Sarai Mound was exposed but whereas in the earlier ASI accounts photographs diagrams and considerable supportive material were part of the report the modern scientific approach did not include this information Nor was there any effort to correlate this find with earlier archaeology This critical analysis is concerned with the consequences of such a radical change in the way archaeology was conducted in India It attempts to look at the history of the archaeology in the relevant historical and intellectual context in order to show that valuable lessons were lost through failure to update and evaluate previous reports in the years following the shift in orientation The work looks more closely at the Chinese texts with reference to what they say about other Buddhist sites And it attempts to bridge the gap between the two archaeological approaches by placing the site and by extension other

Indian sites in a different perspective thereby opening doors to a variety of related disciplines and studies **Long Strange Journey** Gregory P. A.
