

Repair Instructions

Transmission Fluid Check

Description

Inspection of the transaxle fluid level, correct type of fluid, and the condition of the fluid for accurate operation of the transaxle.

Procedure

NOTE

Routine inspection of the transaxle fluid is not required. Transaxle fluid inspection is only required if there is a symptom indicating a concern with the fluid.

1. Park the vehicle on a flat level surface.
2. Operate the vehicle in order for the transmission fluid temperature to reach the normal operating range.

Specification

Transaxle normal temperature: 60-70 degrees C (140-158 degrees F)

3. With the engine at idle, manual shift through all transaxle ranges and return to the PARK position. Leave the engine idling.

6. Remove the transaxle fluid level indicator (2).
7. Wipe away any transaxle fluid from the indicator.
8. Insert the indicator into the transaxle until fully seated.

NOTE

Inspecting transaxle fluid level when not at normal temperature can give an incorrect measurement. The transaxle fluid expands when warm.

9. Remove the indicator and inspect the level and the condition of the oil on the indicator:
 - Transmission fluid level at normal operating temperature (1)
 - Transmission fluid level if cold (2)
10. If the fluid level is incorrect inspect for the following conditions:
 - Fluid below level, inspect for a leak. Refer to "Fluid Leak Diagnosis" or "Automatic Transmission Fluid Leaks".
 - Fluid above level, inspect for contamination of the fluid
