earlier sources and forward to the continued republication of many of these works well into the nineteenth century The first part is concerned with the publishing and distribution of religious books by commercial booksellers and not for profit religious societies and the means by which readers obtained them and how they responded to what they read The second part shows that some of the most important publications were new versions of earlier nonconformist episcopalian Roman Catholic and North American works The third part explores the main literary kinds including annotated bibles devotional guides exemplary lives and hymns Building on many years research into the religious literature of the period Rivers discusses over two hundred writers and provides detailed case studies of popular and influential works

Cults, Territory, and the Origins of the Greek City-State François de Polignac, 1995-08-15 How did the classical Greek city come into being What role did religion play in its formation Athens with its ancient citadel and central religious cult has traditionally been the model for the emergence of the Greek city state But in this original and controversial investigation Francois de Polignac suggests that the Athenian model was probably the exception not the rule in the development of the polis in ancient Greece Combining archaeological and textual evidence de Polignac argues that the eighth century settlements that would become the city states of classical Greece were defined as much by the boundaries of civilized space as by its urban centers The city took shape through what de Polignac calls a religious bipolarity the cults operating both to organize social space and to articulate social relationships being not only at the heart of the inhabited area but on the edges of the territory Together with the urban cults these sanctuaries in the wild identified the polis and its sphere of influence giving rise to the concept of the state as a territorial unit distinct from its neighbors Frontier sanctuaries were therefore often the focus of disputes between emerging communities But in other instances in particular in Greece s colonizing expeditions these outer sanctuaries may have facilitated the relations between the indigenous populations and the settlers of the newly founded cities Featuring extensive revisions from the original French publication and an updated bibliography this book is essential for anyone interested in the history and culture of ancient Greece

Pearls from a Lost City Roman Duda, 2014-08-07 The fame of the Polish school at Lvov rests with the diverse and fundamental contributions of Polish mathematicians working there during the interwar years In particular despite material hardship and without a notable mathematical tradition the school made major contributions to what is now called functional analysis The results and names of Banach Kac Kuratowski Mazur Nikodym Orlicz Schauder Sierpiński Steinhaus and Ulam among others now appear in all the standard textbooks The vibrant joie de vivre and singular ambience of Lvov s once scintillating social scene are evocatively recaptured in personal recollections The heyday of the famous Scottish Caf unquestionably the most mathematically productive cafeteria of all time and its precious Scottish Book of highly influential problems are described in detail revealing the special synergy of scholarship and camaraderie that permanently elevated Polish mathematics from utter obscurity to global prominence This chronicle of the Lvov school its legacy and the tumultuous historical events which defined its lifespan will appeal equally to

mathematicians historians or general readers seeking a cultural and institutional overview of key aspects of twentieth century Polish mathematics not described anywhere else in the extant English language literature **Shadows in the City of Light** Sara R. Horowitz, Amira Bojadzija-Dan, Julia Creet, 2021-05-01 The essays in *Shadows in the City of Light* explore the significance of Paris in the writing of five influential French writers Sarah Kofman Patrick Modiano George Perec Henri Raczymow and Irene Nemirovsky whose novels and memoirs capture and probe the absences of deported Paris Jews These writers move their readers through wartime and postwar cityscapes of Paris walking them through streets and arrondissements where Jews once resided looking for traces of the disappeared The city functions as more than a backdrop or setting Its streets and buildings and monuments remind us of the exhilarating promise of the French Revolution and what it meant for Jews dreaming of equality But the dynamic space of Paris also reminds us of the Holocaust and its aftermath The shadowed paths traced by these writers raise complicated questions about ambivalence absence memory secularity and citizenship In their writing the urban landscape itself bears witness to the absent Jews and what happened to them For the writers treated in this volume neither their Frenchness nor their Jewishness is a fixed point Focusing on Paris's dual role as both a cultural hub and a powerful symbol of hope and conflict in Jewish memory the contributors address intersections and departures among these writers Their complexity of thought artistry and depth of vision shape a new understanding of the impact of the Holocaust on Jewish and French identity on literature and literary forms and on the development of Jewish secular culture in Western Europe **The History and Antiquities of the City of Boston** Samuel G. Drake, 1854
