David Archibald, 2011-03-15 This study identifies the fall of dinosaurs as the factor that allowed mammals to evolve into the dominant tetrapod form It refutes the single cause impact theory for dinosaur extinction and demonstrates that multiple factors massive volcanic eruptions loss of shallow seas and extraterrestrial impact likely led to their demise While their avian relatives ultimately survived and thrived terrestrial dinosaurs did not Taking their place as the dominant land and sea tetrapods were mammals whose radiation was explosive following nonavian dinosaur extinction The author argues that because of dinosaurs Mesozoic mammals changed relatively slowly for 145 million years compared to the prodigious Cenozoic radiation that followed Finally out from under the shadow of the giant reptiles Cenozoic mammals evolved into the forms we recognize today in a mere ten million years after dinosaur extinction *Emerging Critical Scholarship in Education* Carol Mutch, Jean Rath, 2014-04-23 The doctoral journey is fraught with stops and starts crossroads and blind alleys surprises and epiphanies All successful doctoral students navigate a pathway through these events to reach their final destination Navigating the Doctoral Journey explores examples of these routes in ways that both honour individual stories and highlight the broader issues of uniting emergent research practices with doctoral candidates individual reflexive projects All the doctoral candidates included in this book work with critical topics theories and methods within the field of education they face particular challenges and rewards when pursuing work that will meet institutional and disciplinary expectations of good doctoral level research For them the doctoral process is

required to culminate in more than the award of a qualification Their imperative is to demonstrate mastery of the disciplinary norms whilst simultaneously challenging dominant models and making authentic contributions to the benefit of broader society Navigating the Doctoral Journey addresses the isolation and challenges of what it means to conduct critical doctoral research within a highly contested domain of knowledge This is not a simplistic self help guide to clearly map a proven route to doctoral success rather the book provides a range of possible answers to the questions of how candidates experience doctoral studies what is critical about each contributor s research and how this affects what each person does as he or she researches
