

Cultivation Theory and the Crime TV Genre

4 pages | 925 words

When it comes to the cultivation impact in crime genres in television, Dominick (1973) examined Gerbner's theory specifically his studies in cultivation when it comes to crime- or violence-related shows. Dominick mentioned that prior to Gerbner's study published in 1972, there were already past studies as to the presence of crime-related shows as found on television. In fact, as the author mentioned, it was found that even in the majority of the television shows in the 1950s demonstrated many programs of this genre, and that law enforcers were already highly stereotyped. Dominick (1973) cited Gerbner's previous study as a stepping stone to further analyze crime and violence on television; according to the author, Gerbner's studies, which covered television shows in the later half of the 1960s, showed a significant amount of violence and crime on television yet, in reality, there was the noted decrease in violence among criminals but the law enforcers maintained a certain degree of violence. In reflection, Dominick noted that on television, the law enforcers were seen as the main authoritative figure that always saves the day. Hence, in agreeing with Gerbner's study, Dominick's analysis lead to further contribution as to the role of cultivation theory especially as to how the audiences are influenced on their stereotype perceptions, especially in crime- and violence-related shows. Stereotyping seems to be a common element in television crime shows especially as this genre play up certain norms when it comes to the supposed social reality of crime. What is interesting is that racial elements were found to be contributory to these portrayals. For instance, in a study by Dixon (2007), the author noted that responses from heavy television viewers of crime-related programs are most likely the ones to reflect a racial bias in the identification of the perpetrator and the police officer. This shows that even though fact-based programs such as the news present reality, as also adapted in fictional programs, there is the aspect of racialized portrayals. Hence, cultivation in this context has led to certain media imageries that have become a social reality based on the collective perception towards crime racial stereotypes. However, what challenges this is presented by a study conducted by Grabe and Drew (2007) in which the authors examined how crime in the media would actually successfully cultivate specific crime orientations. According to the authors, the study of crime in the media has been a prominent subject in studying cultivation. Grabe and Drew conducted a study among 505 selected adults located in Indiana, and from this, the study concluded that there was a significant variance depending on the many media genres and channels. Hence, the study showed that crime orientation among individuals may not be as strongly influenced by the media especially as viewers have different personal orientations that may affect their own worldviews. This is also reflected by a study executed by Diefenbach and West (2001) in which the authors tested the effect of cultivation theory when it comes to perceptions on violence and crime as seen on television. However, Diefenbach and West also showed results which point at the influence of light versus heavy...

History, Politics and the Evolution of Cultivation Theory Andy Ruddock, 2024-12-01 This book provides a cultural history of cultivation theory a North American mass communication paradigm best known for arguing that television violence was a potent agent of political socialisation Decades after its inception cultivation theory remains an evocative force in imagining twenty first century media power This book reveals how many factors shaped the theory the spectre of twentieth century fascism the Cold War political turbulence in 1960s America and the realisation that television had profoundly altered the rhythms of social and political life The book also explains how cultivation theory became a means of analysing diverse media influences thanks to various scholars who brought different motivations perspectives and skills to the project Cultivation theory succeeded because its practitioners related their work to the changing political moods of post war America In doing so they created a unique critical perspective within mass communication research which continues to shed light on the role media play in political conflict

Essays on Spinoza's Ethical Theory Matthew J. Kisner, Andrew Youpa, 2014-04-17 Thirteen original essays by leading scholars explore aspects of Spinoza's ethical theory and in doing so deepen our understanding of the richly rewarding core of his system Given its importance to his philosophical ambitions it is surprising that his ethics has until recently received relatively little scholarly attention Anglophone philosophy has tended to focus on Spinoza's contribution to metaphysics and epistemology while philosophy in continental Europe has tended to show greater interest in his political philosophy This tendency is problematic not only because it overlooks a central part of Spinoza's project but also because it threatens to present a distorted picture of his philosophy Moreover Spinoza's ethics like other branches of his philosophy is complex difficult and at times paradoxical The essays in this volume advance our understanding of his ethics and also help us to appreciate it as the centerpiece of his system In addition to resolving interpretive difficulties and advancing longstanding debates these essays point the direction for future research Spinoza's enduring contribution to the development of ethical theory to early modern philosophy and indeed to early modern history generally provide us with good reason to follow the lead of these essays

The Contemplative Foundations of Classical Daoism Harold D. Roth, 2021-05-01 In The Contemplative Foundations of Classical Daoism Harold D Roth explores the origins and nature of the Daoist tradition arguing that its creators and innovators were not abstract philosophers but rather mystics engaged in self exploration and self cultivation which in turn provided the insights embodied in such famed works as the Daodejing and Zhuangzi In this compilation of essays and chapters representing nearly thirty years of scholarship Roth examines the historical and intellectual origins of Daoism and demonstrates how this distinctive philosophy emerged directly from practices that were essentially contemplative in nature In the first part of the book Roth applies text critical methods to derive the hidden contemplative dimensions of classical Daoism In the second part he applies a contemplative hermeneutic to explore the relationship between contemplative practices and classical Daoist philosophy and in so doing brings early Daoist writings into conversation with contemporary contemplative studies To this he adds an introduction in which he reflects on the arc and influence on the field of early Chinese thought of this rich vein of scholarship and an afterword in which he applies both interpretive methods to the vexing question of the authorship of the Inner Chapters of the Zhuangzi The Contemplative Foundations of Classical Daoism brings to fruition the cumulative investigations and observations of a leading figure in the emerging field of contemplative studies as they pertain to a core component of early Chinese thought
