Darwinian Evolution and Classical Liberalism Stephen C. Dille, 2013-05-02 Darwinian Evolution and Classical

Liberalism canvasses an array of thinkers from the past to the present as it examines fundamental political philosophical ethical economic anthropological and scientific aspects of the ferment between Darwinian biology and classical liberalism Early chapters focus on classical thinkers like John Locke and Adam Smith while later chapters provide analyses of present day classical liberals focusing especially on F A Hayek Thomas Sowell and Larry Arnhart the most prominent advocates of contemporary classical liberalism Thematically the volume falls into three parts Part I examines foundational matters arguing that Darwinism and classical liberalism hold incompatible visions of morality human nature and individual autonomy This section also contends that the free market s spontaneous order is fully compatible with a teleological or non Darwinian view of the universe Part II turns to contemporary applications contending that Darwinism and classical liberalism are at odds in their views of or implications about limited government vital religion economic freedom and the traditional family This section also argues that since its inception Darwinism has attenuated core tenets and values of classical liberalism and Western civilization Part III of the volume contains alternative views to those in the first two parts adding critical diversity to the book Respectively these chapters hold that Darwinian evolution simply has little to say about classical liberalism an evolutionary account of human volition is fully compatible with the individual choice presupposed in classical liberalism and evolutionary naturalism unlike religious alternatives provides a strong foundation for freedom morality and the traditional family

Why Did God Create Viruses, Bacteria, and Other Pathogens? Jerry Bergman, James Hoff, 2023-05-23 The question Why did God create viruses bacteria pathogens venomous creatures and poisonous chemicals is usually asked by irreligious skeptics to challenge God s authority design and goodness It is also asked by those of faith either out of innocent ignorance or curiosity Life per se is a balance of life forms co existing because they were created by God by means of obvious intelligent design The authors show the vast majority of bacteria viruses and insects are beneficial The reason some pathogens are harmful is discussed in some detail

Furthermore the role of toxic chemicals which are beneficial and even essential to human and animal life at low to moderate concentrations is also covered The authors conclusions are well documented by several hundred peer reviewed scholarly articles and books if you have ever wondered about why in God s creation there are parasites and pathogens ticks and toxins maladies and mosquitoes then you owe it to yourself to consider the scholarly explanations that set the record straight the professional perspective of Bergman and Hoff If you are looking for sound scientific answers to the question Why did God create life forms that have harmful side effects to other organisms this is the book to read **The Blind Scientist**

Alexander J. Bonitto, John S. Knox, 2024-03-05 This book investigates potential neo Darwinian fallacies specifically regarding a priori assumptions that may have led to weak scientific methodology and praxis It was proposed that five concepts must be true for neo Darwinism to be true These are gradualism the tree of life hypothesis the evidence of microevolutionary change accounting for macroevolutionary change time and chance and methodological naturalism Prima facie these concepts have tremendous explanatory power Yet with an attempt to carefully examine these concepts all five seem to be assumed a priori so as to dictate the outcome of neo Darwinism rather than letting the evidence speak for itself The evidence left by the Cambrian explosion genomic potential genetic entropy irreducible complexity genetic limits cyclical change probability theory the epistemology of information and the law of causality seems to pose a dilemma for neo Darwinian assumptions

Lawrence F. Allen, 2022-12-18 Who are the men and women drawn from all civilizations and historical epochs that have made the most original and long lasting contributions to human progress How can we in concise and human terms delineate the various achievements of the most important religious founders philosophers artists prophets scientists mathematicians leaders and architects A fitting pursuit for these distracting and confusing times would be a careful examination of the
