How were developing nations affected by the Cold War?

After World War II, the world's nations were grouped into three "worlds." The First World included the United States and its allies. The Second World consisted of Communist nations led by the Soviet Union. The **Third World** was composed of developing nations in Africa, Asia, and Latin America.

Many Third World nations had serious problems. These problems were often due to a long history of colonialism. Some Third World nations faced political unrest that threatened the peace. Other problems included poverty and a lack of education and technology. Some of these countries tried to stay neutral in the Cold War. They met to form what they called a "third force." It consisted of **nonaligned nations**, or countries that did not take sides between the Soviets and Americans. Others actively sought American or Soviet aid.

The Cold War Divides World Guided Reading:

Remembering the Cold War David Lowe, Tony Joel, 2014-01-21 Remembering the Cold War examines how more than two decades since the collapse of the Soviet Union Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe Given the Cold War s blurred definition it has neither a widely accepted commencement date nor unanimous conclusion what is to be remembered This book illustrates that there is in fact a huge body of remembrance and that it is more pertinent to ask what should be included and what can be overlooked Over five sections this richly illustrated volume considers case studies of Cold War remembering from different parts of the world and engages with growing theorisation in the field of memory studies specifically in relation to war David Lowe and Tony Joel afford careful consideration to agencies that identify with being victims of the Cold War In addition the concept of arenas of articulation which envelops the myriad spaces in which the remembering commemorating memorialising and even revising of Cold War history takes place is given prominence

The Soviet Union and the June 1967 Six Day War Yaacov Ro'i, Boris Morozov, 2008 Why did the Soviet Union spark war in 1967 between Israel and the Arab states by falsely informing Syria and Egypt that Israel was massing troops on the Syrian border Based on newly available archival sources The Soviet Union and the June 1967 Six Day War answers this controversial question more fully than ever before Directly opposing the thesis of the recently published Foxbats over Dimona by Isabella Ginor and Gideon Remez the contributors to this volume argue that Moscow had absolutely no intention of starting a war The Soviet Union s reason for involvement in the region had more to do with enhancing its own status as a Cold War power than any desire for particular outcomes for Syria and Egypt In addition to assessing Soviet involvement in the June 1967 Arab Israeli Six Day War this book covers the USSR s relations with Syria and Egypt Soviet aims U S and Israeli perceptions of Soviet involvement Soviet intervention in the Egyptian Israeli War of Attrition 1969 70 and the impact of the conflicts on Soviet Jewish attitudes This book as a whole demonstrates how the Soviet Union s actions gave little consideration to the long or mid term consequences of their policy and how firing the first shot compelled them to react to events

Science Studies during the Cold War and Beyond Elena Aronova, Simone Turchetti, 2016-09-24 This book examines the ways in which studies of science intertwined with Cold War politics in both familiar and less familiar battlefields of the Cold War Taken together the essays highlight two primary roles for science studies as a new field of expertise institutionalized during the Cold War in different political regimes Firstly science studies played a political role in cultural Cold War in sustaining as well as destabilizing political ideologies in different political and national contexts Secondly it was an instrument of science policies in the early Cold War the studies of science were promoted as the underpinning for the national policies framed with regard to both

global geopolitics and local national priorities As this book demonstrates however the wider we cast our net extending our histories beyond the more researched developments in the Anglophone West the more complex and ambivalent both the science studies and the Cold War become outside these more familiar spaces The national stories collected in this book may appear incommensurable with what we know as science studies today but these stories present a vantage point from which to pluralize some of the visions that were constitutive to the construction of Cold War as a juxtaposition of the liberal democracies in the West and the communist East
