The Collapse Of Soviet Union Guided Reading:

Confounding Powers William J. Brenner, 2016-01-29 Nearly a decade and a half after 9 11 the study of international politics has yet to address some of the most pressing issues raised by the attacks most notably the relationships between Al Qaeda s international systemic origins and its international societal effects This theoretically broad ranging and empirically far reaching study addresses that question and others advancing the study of international politics into new historical settings while providing insights into pressing policy challenges Looking at actors that depart from established structural and behavioral patterns provides opportunities to examine how those deviations help generate the norms and identities that constitute international society Systematic examination of the Assassins Mongols and Barbary powers provides historical comparison and context to our contemporary struggle while enriching and deepening our understanding of the systemic forces behind and societal effects of these confounding powers

Jihadism Constrained Barak Mendelsohn, 2018-10-16 How threatening are al Qaeda and the Islamic State In Jihadism Constrained Barak Mendelsohn suggests that although jihadi terrorism is a serious challenge it must not be exaggerated Transnational terrorist organizations and jihadi transnational groups in particular face three central challenges How to create a polity that is based on religious affiliation when most people identify with national and sub national identities How to generate political effects across borders And how to produce unity among all components of the transnational movement The book argues that transnational jihadism has been struggling on all three fronts Success of armed nonstate actors hinges on their ability to mobilize the masses but transnational jihadis persuaded only a tiny fraction of the world s Muslims to abandon their other identity markers and support a faith based global polity that promotes an extreme interpretation of Islam As military pressure endangers cross border activities jihadi groups introduced local branches only to find that such localization undermines their transnational agenda Jihadi groups also lack a viable plan to turn armed success in separate states into cross border political effects Finally jihadis regularly fall into internal conflicts These conflicts are exacerbated by the use of Islamic discourse that renders compromise and reconciliation particularly difficult

Collapse Vladislav M. Zubok, 2021-11-30 A major study of the collapse of the Soviet Union showing how Gorbachev s misguided reforms led to its demise A deeply informed account of how the Soviet Union fell apart Rodric Braithwaite Financial Times A masterly analysis Joshua Rubenstein Wall Street Journal In 1945 the Soviet Union controlled half of Europe and was a founding member of the United Nations By 1991 it had an army four million strong with five thousand nuclear tipped missiles and was the second biggest producer of oil in the world But soon afterward the union sank into an economic crisis and was torn apart by nationalist separatism Its collapse was one of the seismic shifts of the twentieth century Thirty years on Vladislav Zubok offers a major reinterpretation of the final years of the USSR refuting the notion that the breakup of the Soviet order was inevitable Instead Zubok reveals how Gorbachev s misguided reforms intended to modernize and

democratize the Soviet Union deprived the government of resources and empowered separatism Collapse sheds new light on Russian democratic populism the Baltic struggle for independence the crisis of Soviet finances and the fragility of authoritarian state power *World Studies: Eastern Hemisphere* Heidi Hayes Jacobs, Michal L. Kaushiva, Commander Kamlesh K Agnihotri, 2013-04-15 The maritime domain hosting the highways of global prosperity through trade industrial raw material and energy links rates high in its potential for conflict As the global pendulum of economic vibrancy swings eastwards the Indian Ocean Region IOR has been receiving increasing attention from all actors state as well as non state ones and now presents itself in sharp focus as one of the volatile seascapes on this earth The navies operating in the region will therefore need to depend on high technology and associated doctrines and procedures so as to effectively deal with the wide spectrum of challenges therein It will also become incumbent upon such littoral states as can afford the high cost of technology to catch up so as to maintain their relevance in the great game being played out in their very own backyard The United States as a leader in inventing and exploiting technology sets its own benchmarks in internalization of advanced technologies to undertake maritime missions at and from the sea in support of its military operations ashore China on the other hand has been striving towards achieving asymmetric war fighting capabilities supported by other developing technologies as well as core capabilities like the Beidou position fixing system which would be central to network centric operations including missile guidance systems As the IOR increasingly transforms into an arena of extra regional power play the implications of technologically enabled confrontations and their impact on resident states are poised to weigh in on a scale never imagined before There is thus a greater need for India to gain in depth knowledge of and develop a perspective on advanced technology sensors weapons supporting infrastructures doctrines and futuristic concepts in the maritime domain and their potential as strategic game changers in the IOR This book aims to foster greater understanding of the challenges facing the IOR and also look at how the technological advances in the maritime domain may possibly handle such challenges It should provide useful resource material to those investigating the impact of technology on meeting the maritime challenges in the IOR
