The Collapse Of The Soviet Union Guided Reading:

Confounding Powers William J. Brenner, 2016-01-29 A comparative historical examination of the international systemic and societal origins and effects of Al Qaeda and similar historical actors **World Studies: Eastern Hemisphere** Heidi Hayes Jacobs, Michal L. LeVasseur, 2004-08 Foundations of geography World of geography Earth's physical geography Earth's human geography Cultures of the world Interacting with our environment Europe and Russia Europe and Russia physical geography Europe and Russia shaped by history Cultures of Europe and Russia Western Europe Eastern Europe and Russia Africa Africa physical geography Africa shaped by its history Cultures of Africa North Africa West Africa Exploring East Africa Central and Southern Africa Asia and the Pacific East Asia physical geography South Southwest and Central Asia physical geography Southeast Asia and the Pacific region physical geography East Asia cultures and history South and Southeast Asia cultures and history Southeast Asia and the Pacific region cultures and history East Asia South Southwest and Central Asia Southeast Asia and the Pacific region Glossary *Jihadism Constrained* Barak Mendelsohn, 2018-10-16 How threatening are al Qaeda and the Islamic State In *Jihadism Constrained* Barak Mendelsohn suggests that although jihadi terrorism is a serious challenge it must not be exaggerated Transnational terrorist organizations and jihadi transnational groups in particular face three central challenges How to create a polity that is based on religious affiliation when most people identify with national and sub national identities How to generate political effects across borders And how to produce unity among all components of the transnational movement The book argues that transnational jihadism has been struggling on all three fronts Success of armed nonstate actors hinges on their ability to mobilize the masses but transnational jihadis persuaded only a tiny fraction of the world's Muslims to abandon their other identity markers and support a faith based global polity that promotes an extreme interpretation of Islam As military pressure endangers cross border activities jihadi groups introduced local branches only to find that such localization undermines their transnational agenda Jihadi groups also lack a viable plan to turn armed success in separate states into cross border political effects Finally jihadis regularly fall into internal conflicts These conflicts are exacerbated by the use of Islamic discourse that renders compromise and reconciliation particularly difficult **Culture, Political Economy and Civilisation in a Multipolar World Order** Ray Silvius, 2016-10-04 This book seeks to understand how Russia's multifaceted rejection of American unipolarity and de territorialised neo liberal capitalism has contributed to the gestation of the present multipolar moment in the global political economy Analysing Western world order precepts via the actions of a powerful albeit precarious national political economy and state structure situated on the periphery of Western world order Silvius explores the manner in which culture and ideas are mobilised for the purposes of national regional and international political and economic projects in a post global age The book Explains and analyses the tensions of post Soviet Russia's integration into and simultaneous partial rejection of the capitalist global political economy Provides an overview of the social political and historical origins of Russian samobytnost

uniqueness after the fall of the Soviet Union and demonstrates their significance to contemporary understandings of world order Explores how structures of cultural difference and practices of cultural differentiation interact with the normative legacies of American hegemonic aspirations in contemporary world order structures Evaluates how cultural and civilisational representations are mobilised for state projects and their corresponding regional and international dimensions within the global political economy This book will be of great interest to students and scholars of Russian Foreign Policy IPE and comparative political economy *Inside the Soviet Alternate Universe* Dick Combs,2010-11 Reappraises the end of the Cold War and the collapse of the Soviet Union based on the author s 35 year career as a specialist in Soviet and post Soviet affairs Explores the psychological universe of Soviet rulers to clarify the nature of Mikhail Gorbachev s reforms Provided by publisher **Africa and the Global System of Capital Accumulation** Emmanuel O Oritsejafor,Allan D.

Cooper,2021-04-17 Africa and the Global System of Capital Accumulation offers a groundbreaking analysis of the strategic role Africa plays in the global capitalist economy The exploitation of Africa s rich resources as well as its labor make it possible for major world powers to sustain their authority over their own middle class populations while rewarding African collaborators in leadership positions for subjecting their populations into poverty and desperation Middle class obsessions such as computers mobile phones cars and the petroleum that fuels them diamonds chocolate all of these products require African resources that are typically obtained by child or slave labor that helps to generate billionaires out of foreign investors while impoverishing most Africans Oritsejafor and Cooper demonstrate that primitive accumulation believed by both Adam Smith and Karl Marx to be a process that precedes capitalism is actually an integral part of capitalism They also validate the thesis that capitalism incorporates racism as an organizing tool for the exploitation of labor in Africa and on a global scale Case studies are presented on Nigeria Cote d Ivoire Ghana Liberia Congo Tanzania Somalia Angola Namibia Sao Tome and Principe and South Sudan There are also chapters analyzing the interests of Russia and China in Africa This book will be of interest to students and scholars of African politics development and economics Call to Freedom Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2002-02 Hell on Earth Ludwik Kowalski,2008 The author s father a civil engineer left Poland for the Soviet Union in 1931 An idealistic communist he believed it was his duty to emigrate and to contribute to the building of a new society His wife and his infant son followed soon after In 1938 he was arrested and sent to a GULAG camp in Kolyma where he became a slave in Stalin s state of proletarian dictatorship Two years later he died most likely from exhaustion working in a gold mine In this book The author who is a retired physics professor Professor Emeritus at Montclair State University New Jersey shares what he knows and thinks about Stalinism Educated in the Soviet Union elementary school in Poland high school and master s degree and in France Ph D in nuclear physics he came to the United States in 1964 He deliberately avoided talking about Stalinism and concentrated on professional activities teaching and research Approaching retirement however he wrote an essay on Stalinism entitled Alaska Notes It describes the gruesome

Soviet reality focusing on Kolyma and on Stalin's inner circle The essay contained comments on what has been published by some survivors of Stalinism and by authors of several scholarly books such as Leszek Kolakowski Alaska Notes was posted on the Internet discussion list at Montclair State University This public forum revealed a wide range of opinions about communism The animated discussion mostly among professors convinced the author to transform the essay into this book It is dedicated to all victims of Stalinism and in particular to the author's father a naive idealist deceived by propaganda Royalties will be donated to a Montclair State University scholarship fund

Yee, 2024-01-25 This unique volume on the Psalms is the final Hebrew Bible installment of the Texts Contexts series Each contribution provides a contextual reflection on a Psalm as chosen by the contributor These contributions take account of the contributor's own personal context or the contexts of those around them providing readings that are varied in geographical and linguistic scope that reflect on pressing themes such as immigration diversity race marginalized voices such as those of adults with learning disabilities and postcolonialism Scholars also reflect on their own contexts of research and education Taken together the contributions to this volume provide a sort of contextual commentary on the Psalms gathering a wide range of voices and reflecting a diverse range of cultural afterlives of the Psalms **An Analysis of Thucydides's History of the Peloponnesian War** Mark Fisher, 2017-07-05 Few works can claim to form the foundation stones of one entire academic discipline let alone two but Thucydides's celebrated History of the Peloponnesian War is not only one of the first great works of history but also the departure point from which the modern discipline of international relations has been built This is the case largely because the author is a master of analysis setting out with the aim of giving a clear well reasoned account of one of the seminal events of the age a war that resulted in the collapse of Athenian power and the rise of Sparta Thucydides took care to build a single beautifully structured argument that was faithful to chronology and took remarkably few liberties with the source materials He avoided the sort of assumptions that make earlier works frustrating for modern scholars for example seeking reasons for outcomes that were rooted in human actions and agency not in the will of the gods And he was careful to explain where he had obtained much of his information As a work of structure and as a work of reasoning The History of the Peloponnesian War continues to inspire be read and be taught more than 2 000 years after it was written **Daily Life of Women** Colleen Boyett, H. Micheal Tarver, Mildred Diane Gleason, 2020-12-07 Indispensable for the student or researcher studying women's history this book draws upon a wide array of cultural settings and time periods in which women displayed agency by carrying out their daily economic familial artistic and religious obligations Since record keeping began history has been written by a relatively few elite men Insights into women's history are left to be gleaned by scholars who undertake careful readings of ancient literature examine archaeological artifacts and study popular culture such as folktales musical traditions and art For some historical periods and geographic regions this is the only way to develop some sense of what daily life might have been like for women in a particular time and place This reference explores the daily life of women across civilizations The work is organized in sections on different civilizations from around the world arranged chronologically Within each society the encyclopedia highlights the roles of women within five broad thematic categories the arts economics and work family and community life recreation and social customs and religious life Included are numerous sidebars containing additional information document excerpts images and suggestions for further reading **Diaspora and Citizenship** Claire Sutherland, Elena

Barabantseva,2013-09-13 This collection of papers discusses the impact of diasporas on the articulations and practices of legal political cultural and social citizenship in their country of origin While the majority of current citizenship debates focus on the challenges and directions in which diasporic and migrant communities impact on the citizenship regime in their country of settlement the papers in this volume approach the study of citizenship from the perspective of the link between the sending state and its diasporic communities abroad The papers discuss the role of language religion kinship and other ethnic markers in diaspora politics and trace their implications for the articulations and practices of citizenship Through discussing cases across political and geographical spectrums and from different historical epochs the book broadens and enriches the debate on citizenship by demonstrating important ways in which diasporas impact on the delineation of citizenship regimes and the politics of national identity in their homeland This links to the continued use of language as an ethnic marker but also one which may be learned allowing a certain degree of choice and shifting affiliations amongst putative members of a diaspora This book was published as a special issue of Nationalism and Ethnic Politics

Encyclopedia of United States National Security Richard J. Samuels,2006 Covers the origin development and results of all major national security policies over the last seven decades A thoroughly interdisciplinary work the encyclopedia views national security from a historical economic political and technological perspective A Dictionary of 20th-Century Communism Silvio Pons,Robert Service,2022-04-12 An encyclopedic guide to 20th century communism around the world The first book of its kind to appear since the end of the Cold War this indispensable reference provides encyclopedic coverage of communism and its impact throughout the world in the 20th century With the opening of archives in former communist states scholars have found new material that has expanded and sometimes altered the understanding of communism as an ideological and political force A Dictionary of 20th Century Communism brings this scholarship to students teachers and scholars in related fields In more than 400 concise entries the book explains what communism was the forms it took and the enormous role it played in world history from the Russian Revolution through the collapse of the Soviet Union and beyond Examines the political intellectual and social influences of communism around the globe Features contributions from an international team of 160 scholars Includes more than 400 entries on major topics such as Figures Lenin Mao Stalin Ho Chi Minh Pol Pot Castro Gorbachev Events Cold War Prague Spring Cultural Revolution Sandinista Revolution Ideas and concepts Marxism Leninism cult of personality labor Organizations and movements KGB Comintern Gulag Khmer Rouge Related topics totalitarianism nationalism antifascism anticommunism McCarthyism Guides readers to further research through bibliographies cross references and an index **Oligarchs and Oligopolies** Bruce Kapferer,2005-08-01 As corporate practices are becoming more fused with state processes the state itself is increasingly taking on a corporate structure as well as a more overt oligarchic character Evidence of this can be seen in the growing domination of political organizations and institutions by close knit social groups familial dynasties closed associations or personal networks that

seek exclusive control over economic resources These new forms of state power that are emerging are not reducible to the past and the nation state as the essays in this volume show is giving way to a political economic formation that has multiple state like effects and is able to act in ways systemic with deterritorializing global processes Exploring these processes in different concrete locations from North America to Russia West Africa and Australia the authors show that current configurations of global imperial and state power cannot be understood without examining their relation to formations of oligarchic control They bring us closer to an understanding of the ways in which the nation state is being transformed by globalization

Human Rights Discourse in the Post-9/11 Age Kanishka Chowdhury, 2019-03-21 This book offers a materialist critique of mainstream human rights discourse in the period following 9 11 examining literary works critical histories international declarations government statutes NGO manifestos and a documentary film The author points out some of the contradictions that emerge in contemporary rights language when material relations are not sufficiently perceived or acknowledged and he directs attention to the role of some rights talk in maintaining and managing the accelerated global project of capital accumulation Even as rights discourse points to injustices for example injustices related to labor gender the citizen s relationship to the state or the movement of refugees it can simultaneously maintain systems of oppression By constructing subjects who are aligned to the interests of capital by emphasizing individual empowerment and or by containing social disenchantment it reinforces the process of wealth accumulation supports neoliberal ideologies and diminishes the possibility of real transformation through collective struggle
