Reinventing World War II Barbara A. Biesecker, 2024-08-09 By the 1970s World War II had all but disappeared from US popular culture But beginning in the mid eighties it reemerged with a vengeance and for nearly fifteen years World War II was ubiquitous across US popular and political culture In this book Barbara A Biesecker explores the prestige and rhetorical power of the Good War revealing how it was retooled to restore a new kind of social equilibrium to the United States Biesecker analyzes prominent cases of World War II remembrance including the canceled exhibit of the Enola Gay at the National Air and Space Museum in 1995 and its replacement Steven Spielberg s Saving Private Ryan Tom Brokaw s The Greatest Generation and the United States Holocaust Memorial Museum Situating these popular memory texts within the culture and history wars of the day and the broader framework of US political and economic life Biesecker argues that with the notable exception of the Holocaust Memorial Museum these reinventions of the Good War worked rhetorically to restore a strong sense of national identity and belonging fitted to the neoliberal nationalist agenda By tracing the links between the popular retooling of World War II and the national state fantasy and by putting the lessons of Foucault Derrida Lacan and their successors to work for a rhetorical political analysis of the present Biesecker not only explains the emergence and strength of the MAGA movement but also calls attention to the power of public memory to shape and contest ethnonational identity today This book will interest rhetoricians and historians as well as students and scholars in the fields of US politics and communication studies *United States Army in World War II* United States. Military History, Office of the Chief of, 1964 United States Army in World War II Harry L. Coles, Albert K. Weinberg, 1986 A documentary history with brief narrative introductions illustrating the evolution of civil affairs policy and practice in the Mediterranean and European theaters Most important of all in World War II soldiers became governors in a much broader sense than ever before so much

more than was foreseen that the Army's specialized training proved scant preparation for perhaps the most important phase of their role. They became not merely the administrators of civilian life for the Army's immediate needs but at the same time the executors and at times even by force of circumstances the proposers of national and international political policy. This broader role arose from the fact that in World War II the Allies strove to realize from the very beginning of occupation political aims that had usually not been implemented during war or if during war at all not until active hostilities had ended. Thus in enemy countries civil affairs officials were immediately to extirpate totalitarian governmental and economic systems; in liberated countries they were as soon as possible to aid in restoring indigenous systems and authorities and in both types of countries they were to make an all-out effort to effect gradual transition toward the envisaged postwar national and international order.

World War II on Film David Lührssen, 2020-11-09 World War II on Film examines the war through the lens of 12 films. The movies selected include productions made during World War II and in each succeeding decade providing a sense of how different generations perceive the war. World War II on Film provides a succinct yet well-grounded appraisal of that war as seen through 12 representative films. The book separates fact from fiction showing where the movies were accurate and where they departed from reality and places them in the larger context of historical and social events. Each movie chosen represents a particular aspect of the conflict including the air war over Europe, the condition of prisoners of war, Nazi atrocities and the British evacuation at Dunkirk. Unlike most histories of Hollywood during World War II or the genre of war movies, World War II on Film examines in depth the relation between the depictions of events, beliefs, attitudes and ways of life as seen on film with reality as documented by historians or recorded by journalists or eyewitnesses to the war. The volume will appeal to high school and college readers as well as general interest readers and film buffs.
