The Current Global Ebola Outbreak Real Or False Flag:

Contemporary Conspiracy Culture Jaron Harambam, 2020-04-22 In this ethnographic study the author takes an agnostic stance towards the truth value of conspiracy theories and delves into the everyday lives of people active in the conspiracy milieu to understand better what the contemporary appeal of conspiracy theories is Conspiracy theories have become popular cultural products endorsed and shared by significant segments of Western societies Yet our understanding of who these people are and why they are attracted by these alternative explanations of reality is hampered by their implicit and explicit pathologization Drawing on a wide variety of empirical sources this book shows in rich detail what conspiracy theories are about which people are involved how they see themselves and what they practically do with these ideas in their everyday lives The author inductively develops from these concrete descriptions more general theorizations of how to understand this burgeoning subculture He concludes by situating conspiracy culture in an age of epistemic instability where societal conflicts over knowledge abound and the Truth is no longer assured but out there for us to grapple with This book will be an important source for students and scholars from a range of disciplines interested in the depth and complexity of conspiracy culture including Anthropology Cultural Studies Communication Studies Ethnology Folklore Studies History Media Studies Political Science Psychology and Sociology More broadly this study speaks to contemporary public debates about truth and knowledge in a supposedly post truth era including widespread popular distrusts towards elites mainstream institutions and their knowledge

Contagion and the Responsibility of Networks Pietro Battiston, 2024-12-19 Contagion is a crucial term in the theory of networks that is nowadays employed to study increasingly diverse issues such as financial crises epidemics and fake news It provides a unifying framework to describe various social and economic phenomena that occur within different networks involving various forms of contagion This book discusses contagion over social and economic networks and its consequences for modern societies It starts with an accessible but solid introduction to basic concepts of the theory of networks with intuitive explanations and examples both of networks that shape our daily lives and of how researchers analyze them It then focuses specifically on contagion and on its importance for societies Three crucial examples are analyzed more in depth epidemiological contagion fake news and financial crises The conclusions show how various societal problems each consequence of some form of contagion call for similar policy measures a pre-emptive and comprehensive effort in collecting the required information and a shift in the concept of individual responsibility itself This is a book for any reader who is interested in how contagion and networks shape modern society

What we can learn from the past Rafael Barracuda, 2024-01-20 If we do not learn from history we will repeat the mistakes of the present and the past In earlier times this was already not good but in today's times it can endanger life on earth This book addresses the question Could things have turned out differently There are times when a choice determines war or peace happiness or unhappiness These are called nodes Also this book covers 120 lessons from

history and certain topics are covered in depth This book is a must read for anyone interested in politics and society The question of what not only can we do with these lessons from world history is eventually addressed as well as the question of what we should ultimately do to prevent misery This book is about lessons from world history that could be applied to the present and the future *The Covid-19 Conundrum* David Klooz, 2020-05-29 If you want to be scared buy this if only to read the last four chapters on biological level 3 and 4 labs and biological warfare If you do not want to do that research it yourself You will be enlightened and scared beyond belief I began writing the book because of my interest and confusion about what has been taking place around the globe since the year 2020 began The West went from hearing about Jeffrey Epstein being murdered in his prison cell and Prince Andrew lying worldwide during an interview to the continual broadcasts of Covid 19 a plague of biblical proportion that was on its way to kill millions as reported by the mass media It still is being reported over and over but now added is the second wave how bad will it be How bad was the first one I worked in the field of public health for 32 years the last 10 years as Associate Commissioner of Public Health in a Canadian Public Health Department responsible for a population of close to one half million people If I learned one thing over those years it is that only programs strategies and interventions that are evidence based work Anything else is so much window dressing One excellent example is school nurses Why is that program still in place Because it always has been that way Window dressing The more I researched Covid 19 the more rather than less confused I became Testing was flawed the science was more than bad data was all over the place methodologies were different and interventions like lockdowns and closures were anything but evidence based Of all the countries Sweden came the closest to reacting with strategies that were evidence based In all my years of public health practice the great majority of those at risk were the always the aged the young those with chronic illnesses and those in the low socioeconomic category now getting to be the largest category in the population Those people were always targeted during cold alerts heat alerts smog alerts etc etc Mass closures of work and schools were never a thought Why this time What I will show you in this book or story is merely a number of real facts and interviews mostly not reported by the mass media including strange and flawed data reversals in decisions based upon nothing tangible and rumors and innuendos There is something very wrong in this entire story something that is being covered up and not reported I have some thoughts but not enough evidence to arrive at any solid conclusion So while I am not supporting any particular theory I hope if you are able to read some of the research and news stories that have been documented that you will have a better sense of what is happening and what is now or will be hidden possibly under the now always present label of National Security [Global Epidemics, Local Implications](#) Kevin J. A. Thomas, 2019-12-17 How fear and stigma affected the lives of African immigrants during the global Ebola epidemic and the resilient ways in which immigrant communities responded In December 2013 a series of Ebola infections in Meliandou Guinea set off a chain of events culminating in the world's largest Ebola epidemic Concerns about the virus in the United States reached a peak when Thomas Duncan a Liberian national

visiting family in Dallas became the first person to be diagnosed with Ebola and die of the disease on US soil In *Global Epidemics Local Implications* Kevin J A Thomas highlights the complex ways in which disease outbreaks that begin in one part of the world affect the lives of immigrants in another Drawing on information from a community survey participant observations government documents and newspapers Thomas examines how African immigrants were negatively affected by public backlash and their agency and resilience in responding to the consequences of epidemic Ultimately this book shows how these responses underscore the importance of immigrant resources for developing public health interventions *Trash Talk* Patricia A.
