The Deaf Mute Howls:

The Deaf Mute Howls Albert Ballin, 1998 The Deaf Mute Howls Albert Ballin, 1998 The First Volume in the Gallaudet Classics in Deaf Studies Series Albert Ballin's greatest ambition was that The Deaf Mute Howls would transform education for deaf children and more the relations between deaf and hearing people everywhere While his primary concern was to improve the lot of the deaf person shunned and isolated as a useless member of society his ambitions were larger yet He sought to make sign language universally known among both hearing and deaf He believed that would be the great Remedy as he called it for the ills that afflicted deaf people in the world and would vastly enrich the lives of hearing people as well The Introduction by Douglas Baynton author Forbidden Signs Originally published in 1930 The Deaf Mute Howls flew in the face of the accepted practice of teaching deaf children to speak and read lips while prohibiting the use of sign language The sharp observations in Albert Ballin's remarkable book detail his experiences and those of others at a late 19th century residential school for deaf students and his frustrations as an adult seeking acceptance in the majority hearing society The Deaf Mute Howls charts the ambiguous attitudes of deaf people toward themselves at this time Ballin himself makes matter of fact use of terms now considered disparaging such as deaf mute and he frequently rues the atrophy of the parts of his brain necessary for language acquisition At the same time he rails against the loss of opportunity for deaf people and he commandingly shifts the burden of blame to hearing people unwilling to learn the Universal Sign Language his solution to the communication problems of society From his lively encounters with Alexander Graham Bell whose desire to close residential schools he surprisingly supports to his enthrallment with the film industry Ballin's highly readable book offers an appealing look at the deaf world during his richly colored lifetime Albert Ballin born in 1867 attended a residential school for the deaf until he was sixteen Thereafter he worked as a fine artist a lithographer and also as an actor in silent era films He died in 1933 **Angels and Outcasts** Trenton W. Batson, Eugene Bergman, 1985 This is a fascinating enjoyable book It could well be used in study groups at the high school or college level to explore both history and attitudes toward deafness Rehabilitation Literature The editors are not enthralled as so many of us seem to be simply that deaf or disabled characters exist in literature they ask why The rest of the disability movement could learn from them The Disability Rag Dickens Welty and Turgenev are only three of the master storytellers in Angels and Outcasts This remarkable collection of 14 short stories offers insights into what it means to be deaf in a hearing world The book is divided into three parts the first section explores works by nineteenth century authors the second section concentrates on stories by twentieth century authors and the final section focuses on stories by authors who are themselves deaf Each section begins with an introduction by the editors and each story is preceded by a preface Angels and Outcasts concludes with an annotated bibliography of other prose works about the deaf experience In addition to fascinating reading it provides valuable insights into the world of the deaf Trent Batson is Director of Academic Technology at Gallaudet University Eugene Bergman former Associate professor of English at

Gallaudet University is now retired

Deaf Gain H-Dirksen L. Bauman, Joseph J. Murray, 2014-10-15 Deaf people are usually regarded by the hearing world as having a lack as missing a sense Yet a definition of deaf people based on hearing loss obscures a wealth of ways in which societies have benefited from the significant contributions of deaf people In this bold intervention into ongoing debates about disability and what it means to be human experts from a variety of disciplines neuroscience linguistics bioethics history cultural studies education public policy art and architecture advance the concept of Deaf Gain and challenge assumptions about what is normal Through their in depth articulation of Deaf Gain the editors and authors of this pathbreaking volume approach deafness as a distinct way of being in the world one which opens up perceptions perspectives and insights that are less common to the majority of hearing persons For example deaf individuals tend to have unique capabilities in spatial and facial recognition peripheral processing and the detection of images And users of sign language which neuroscientists have shown to be biologically equivalent to speech contribute toward a robust range of creative expression and understanding By framing deafness in terms of its intellectual creative and cultural benefits Deaf Gain recognizes physical and cognitive difference as a vital aspect of human diversity Contributors David Armstrong Benjamin Bahan Gallaudet U Hansel Bauman Gallaudet U John D Bonvillian U of Virginia Alison Bryan Teresa Blankmeyer Burke Gallaudet U Cindee Calton Debra Cole Matthew Dye U of Illinois at Urbana Champaign Steve Emery Ofelia Garc a CUNY Peter C Hauser Rochester Institute of Technology Geo Kartheiser Caroline Kobek Pezzarossi Christopher Krentz U of Virginia Annelies Kusters Irene W Leigh Gallaudet U Elizabeth M Lockwood U of Arizona Summer Loeffler Mara L cia Massuti Instituto Federal de Santa Catarina Brazil Donna A Morere Gallaudet U Kati Morton Ronice M ller de Quadros U Federal de Santa Catarina Brazil Donna Jo Napoli Swarthmore College Jennifer Nelson Gallaudet U Laura Ann Petitto Gallaudet U Suvi Pylv nen Kymenlaakso U of Applied Sciences Antti Raika Aalto U P ivi Rain U of Applied Sciences Humak Katherine D Rogers Clara Sherley Appel Kristin Snoddon U of Alberta Karin Strobel U Federal de Santa Catarina Brazil Hilary Sutherland Rachel Sutton Spence U of Bristol England James Tabery U of Utah Jennifer Grinder Witteborg Mark Zaurov

Signing the Body Poetic Heidi M. Rose, 2006 Publisher Description *The Invention of Miracles* Katie Booth, 2022-05-10 An astonishingly revisionist biography of Alexander Graham Bell telling the true and troubling story of the inventor of the telephone We think of Alexander Graham Bell as the inventor of the telephone but that s not how he saw his own career Bell was an elocution teacher by profession As the son of a deaf woman and later husband to another his goal in life from adolescence was to teach the deaf to speak Even his tinkering sprang from his teaching work the telephone had its origins as a speech reading machine And yet by the end of his life despite his best efforts or perhaps more accurately because of them Bell had become the American Deaf community s most powerful enemy The Invention of Miracles recounts an extraordinary piece of forgotten history Weaving together a moving love story with a fascinating tale of innovation it follows the complicated tragedy of a brilliant young man who set about stamping out what he saw as a dangerous language

Sign The book offers a heartbreaking look at how heroes can become villains and how good intentions are unfortunately nowhere near enough as well as a powerful account of the dawn of a civil rights movement and the triumphant tale of how the Deaf community reclaimed their once forbidden language Katie Booth has been researching this story for over a decade poring over Bell's papers Library of Congress archives and the records of deaf schools around America But she's also lived with this story for her entire life Witnessing the damaging impact of Bell's legacy on her family would set her on a path that upturned everything she thought she knew about language power deafness and the telephone

Recovering Bodies G. Thomas Couser, 1997-11-01 This is a provocative look at writing by and about people with illness or disability in particular HIV AIDS breast cancer deafness and paralysis who challenge the stigmas attached to their conditions by telling their lives in their own ways and on their own terms Discussing memoirs diaries collaborative narratives photo documentaries essays and other forms of life writing G Thomas Couser shows that these books are not primarily records of medical conditions they are a means for individuals to recover their bodies or those of loved ones from marginalization and impersonal medical discourse Responding to the recent growth of illness and disability narratives in the United States such works as Juliet Wittman's *Breast Cancer Journal* John Hockenberry's *Moving Violations* Paul Monette's *Borrowed Time* An AIDS Memoir and Lou Ann Walker's *A Loss for Words* The Story of Deafness in a Family Couser addresses questions of both poetics and politics He examines why and under what circumstances individuals choose to write about illness or disability what role plot plays in such narratives how and whether closure is achieved who assumes the prerogative of narration which conditions are most often represented and which literary conventions lend themselves to representing particular conditions By tracing the development of new subgenres of personal narrative in our time this book explores how explicit consideration of illness and disability has enriched the repertoire of life writing In addition Couser's discussion of medical discourse joins the current debate about whether the biomedical model is entirely conducive to humane care for ill and disabled people With its sympathetic critique of the testimony of those most affected by these conditions *Recovering Bodies* contributes to an understanding of the relations among bodily dysfunction cultural conventions and identity in contemporary America
