The Changing East Asian Security Landscape Stefan Fröhlich, Howard Loewen, 2017-11-14 The topic of this book deals with a highly relevant empirical issue East Asian security and the dynamics of the respective governance structure or architecture are not only of regional but of global concern Since the pivot of the American pivot to East Asia and other external actor's responses to it the security architecture has changed in form size and function In order to analyze and explain these changes hypotheses derived from IR middle range theories i.e. soft and hard balancing will be applied to cases of bilateral and multilateral security governance in East Asia **"Code of Massachusetts regulations, 2014"**, 2014 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 Redefining Theory and Practice to Guide Social Transformation: Emerging Research and Opportunities Fisher-Yoshida, Beth, Camilo Lopez, Joan, 2020-12-25 The application of theory to practice in addressing social transformation still has a lot of room for growth and improvement This is also true of theory being informed by practice Too often there are gaps between what is studied in the academy and what is needed in the field The academy develops theories in isolation from the everyday lives of people especially in post conflict environments Communities seeking innovative ways to address their social needs can benefit from the learning of theories and research conducted within academia At the same time these methods need to be relevant to the local contexts within which they are being used While there are certain norms of communication in the academy of how research is conducted and disseminated there needs to be a translation into practical terms to be used in the field Redefining Theory and Practice to Guide Social Transformation Emerging Research and Opportunities addresses the need practitioners and social change agents have in finding processes and practices to use in the field to engage with and transform communities This critical reference book provides an innovative fieldwork method that leads to social transformation and suggests ways to further develop the relationship between academic theories and practices around social conflicts with the existing local knowledge The chapters include mini case studies that have been developed over the years from the authors work with youth and community leaders with the objective of providing a methodology that allows practitioners to approach the field by engaging with local actors in ways that are generative and trustworthy yet rigorous While highlighting the practices notions and technologies that are at work in conflict post conflict or transitioning out of conflict settings by local community leaders this book is ideally for practitioners in the field of conflict peacebuilding and social and conflict transformation community leaders and social organizers as well as practitioners stakeholders researchers academicians and students interested in social transformation **The Mindful School** Patricia A. Sustaining Depth and Meaning in School Leadership Emil Jackson, Andrea Berkeley, 2020-07-15

Sustaining Depth and Meaning in School Leadership Keeping Your Head concerns the emotional and psychological experience of school leadership, in particular the felt experience of life as a headteacher. It describes the pressures and rewards of the role together with some of the ways that school leaders successfully sustain and develop themselves and their teams in what has become an increasingly complex, challenging and highly accountable role. This book explores the personal experience of leading schools. Part I provides an overview and analysis of current and historical trends in school leadership and offers some theoretical frameworks for making sense of these. Part II then offers psychodynamic approaches to supporting and developing school leaders and the impact that trends in executive education continue to have on this. Part III looks at approaches to school leadership development more generally, including team development, influences from the business world, the growth of mentoring and coaching as a leadership intervention, the design and evaluation of leadership development programmes and a case study on whole system development. The final word is given to ten serving headteachers and deputies and their leadership journeys. This range of chapters, concepts and perspectives will support school leaders to maintain an emotional equilibrium while navigating the multilayered tightrope of intrapsychic, interpersonal and organizational dynamics inherent in school life. Rooted in Jackson and Berkeley's belief that school leaders are likely to be at their best when they find their own unique and authentic way of taking up their leadership role, this book is an accessible, supportive and developmental contribution for all those involved in education leadership.
