Psychedelic Mysticism Morgan Shipley,2015-11-12 Concerned with scholarly popular and religious backdrops that understand the connection between psychedelics and mystical experiences to be devoid of moral concerns and ethical dimensions a position supported empirically by the rise of acid fascism and psychedelic cults by the late 1960s Psychedelic Mysticism Transforming Consciousness Religious Experiences and Voluntary Peasants in Postwar America traces the development of sixties psychedelic mysticism from the deconditioned mind and perennial philosophy of Aldous Huxley to the sacramental ethics of Timothy Leary Richard Alpert and Ralph Metzner to the altruistic religiosity practiced by Stephen Gaskin and The Farm Building directly off the pioneering psychedelic writing of Huxley these psychedelic mystics understood the height of psychedelic consciousness as an existential awareness of unitive oneness a position that offered worldly alternatives to the

maladies associated with the postwar moment e g vapid consumerism and materialism lifeless conformity unremitting racism heightened militarism In opening a doorway to a common world Morgan Shipley locates how psychedelics challenged the coherency of Western modernity by fundamentally reorienting postwar society away from neoliberal ideologies and toward a sacred understanding of reality defined by mutual coexistence and responsible interdependence In 1960s America psychedelics catalyzed a religious awakening defined by compassion expressed through altruism and actualized in projects that sought to ameliorate the conditions of the least advantaged among us In the exact moments that historians and cultural critics often locate as signaling the death knell of the counterculture Gaskin and The Farm emerged not as a response to the perceived failures of the hippies nor as an alternative to sixties politics but in an effort to fulfill the religious obligation to help teach the world how to live more harmoniously Today as we continue to confront issues of socioeconomic inequality entrenched differences widespread violence and the limits of religious pluralism Psychedelic Mysticism serves as a timely reminder of how religion in America can operate as a tool for destabilization and as a means to actively reimagine the very basis of how people relate such a legacy can aid in our own efforts to build a more peaceful sustainable and compassionate world

Nietzsche and Zen André van der Braak, 2011-08-16 In *Nietzsche and Zen Self Overcoming Without a Self* Andr van der

Braak engages Nietzsche in a dialogue with four representatives of the Buddhist Zen tradition Nagarjuna c 150 250 Linji d 860 Dogen 1200 1253 and Nishitani 1900 1990 In doing so he reveals Nietzsche s thought as a philosophy of continuous self overcoming in which even the notion of self has been overcome Van der Braak begins by analyzing Nietzsche s relationship to Buddhism and status as a transcultural thinker recalling research on Nietzsche and Zen to date and setting out the basic argument of the study He continues by examining the practices of self overcoming in Nietzsche and Zen comparing Nietzsche s radical skepticism with that of Nagarjuna and comparing Nietzsche s approach to truth to Linji s Nietzsche s methods of self overcoming are compared to Dogen s zazen or sitting meditation practice and Dogen s notion of forgetting the self These comparisons and others build van der Braak s case for a criticism of Nietzsche informed by the ideas of Zen Buddhism and a criticism of Zen Buddhism seen through the Western lens of Nietzsche coalescing into one world philosophy This treatment focusing on one of the most fruitful areas of research within contemporary comparative and intercultural philosophy will be useful to Nietzsche scholars continental philosophers and comparative philosophers

Radiant Mind Jean Smith, 1999 This collection of starting points and texts of Buddha s discourses is filled with insightful commentaries and interpretations by the Dalai Lama Thich Nhat Hanh and other Buddhist thinkers

The Lens of Perception Hal Zina Bennett, 2012-09-05 The lens of perception the part of human consciousness that experiences reality is a core concept in virtually every spiritual and psychological tradition from ancient Buddhism to Native American shamanism to Jungian psychology Hal Zina Bennett proposes that if we can comprehend and harness this consciousness we can shape our experiences and fulfill our greatest potential By deconstructing the inner workings of the human mind this skillfully written book unravels the Gordian knot of reality itself A guided tour of human consciousness that takes the reader from individual self awareness to becoming the co creator of

reality An underground cult favorite that was way ahead of its time reissued as a New Thought classic in a freshly revised third edition Thanks to the success of the film *What the Bleep Do We Know* which has grossed over 12 million and inspired hundreds of online discussion groups alternative consciousness is hot again *Field & Stream*, 1985-02 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations Dorothy Day, Thomas Merton and the Greatest Commandment Leininger Pycior, Julie, 2020 Catholic Worker leader Dorothy Day and monk author Thomas Merton who gave radical witness to love of God and neighbor in the tumultuous 1960s together come center stage in this compelling account of the visionary duo spotlighted by Pope Francis in his historic address to Congress *The English Catalogue of Books* Sampson Low, 1911 Volumes for 1898 1968 include a directory of publishers **MotorBoating**, 1981-01 **The Way of Conflict** Deidre Combs, 2011-02-08 The Way of Conflict teaches strategies for using ancient wisdom and modern techniques to confidently engage in any dispute and reach a balanced resolution This groundbreaking book integrates the wealth of conflict skills found throughout the world's major religious and indigenous traditions with the latest scientific systems and conflict resolution theory It uses the cross cultural metaphor of the four natural elements earth water fire and air to identify the innate conflict personality types and propose a productive path through the chaos of conflict Combining her extensive experience as a licensed mediator and corporate trainer with wisdom gained from years of spiritual study Combs uses assessment tests anecdotes from indigenous and religious traditions and illustrative folktales to show how to quickly assess a conflict and implement an appropriate resolution strategy *Thomas Merton and the Individual Witness* David E Oberon, 2024-09-26 Thomas Merton proclaimed over sixty years ago that we were living in a post Christian world Since then in an increasingly secular society where the influence of the institutional church is under doubt Thomas Merton's reflections are more salient than ever David Oberon's discussion and analysis brings this mystic monk and spiritual leader's view of the opportunities presented to Christians by cultural changes to the forefront focussing on how the individual's witness can take precedence Oberon situates the reader in the current cultural context and handles Merton's work with care and clarity He illuminates Thomas Merton's unique view of his own society which credibly speaks to our present aiding Christians in navigating a post Christian post truth world **America and the Challenges of Religious Diversity** Robert Wuthnow, 2011-07-01 Muslims Hindus Buddhists and adherents of other non Western religions have become a significant presence in the United States in recent years Yet many Americans continue to regard the United States as a Christian society How are we adapting to the new diversity Do we casually announce that we respect the faiths of non Christians without understanding much about those faiths Are we willing to do the hard work required to achieve genuine religious pluralism Award winning author Robert Wuthnow tackles these and other difficult questions surrounding religious diversity and does so with his characteristic rigor and style *America and the Challenges of Religious Diversity* looks not only at how we have

adapted to diversity in the past but at the ways rank and file Americans clergy and other community leaders are responding today Drawing from a new national survey and hundreds of in depth qualitative interviews this book is the first systematic effort to assess how well the nation is meeting the current challenges of religious and cultural diversity The results Wuthnow argues are both encouraging and sobering encouraging because most Americans do recognize the right of diverse groups to worship freely but sobering because few Americans have bothered to learn much about religions other than their own or to engage in constructive interreligious dialogue Wuthnow contends that responses to religious diversity are fundamentally deeper than polite discussions about civil liberties and tolerance would suggest Rather he writes religious diversity strikes us at the very core of our personal and national theologies Only by understanding this important dimension of our culture will we be able to move toward a more reflective approach to religious pluralism

Psychology, Religion, and Spirituality

James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult
