The Good Immigrants Madeline Y. Hsu,2015-04-27 Conventionally US immigration history has been understood through the lens of restriction and those who have been barred from getting in In contrast *The Good Immigrants* considers immigration from the perspective of Chinese elites intellectuals businessmen and students who gained entrance because of immigration exemptions Exploring a century of Chinese migrations Madeline Hsu looks at how the model minority characteristics of many Asian Americans resulted from US policies that screened for those with the highest credentials in the most employable fields enhancing American economic competitiveness The earliest US immigration restrictions targeted Chinese people but exempted students as well as individuals who might extend America's influence in China Western educated Chinese such as Madame Chiang Kai shek became symbols of the US impact on China even as they patriotically advocated for China's modernization World War II and the rise of communism transformed Chinese students abroad into refugees and the Cold War magnified the importance of their talent and training As a result Congress legislated piecemeal legal measures to enable Chinese of good standing with professional skills to become citizens Pressures mounted to reform

American discriminatory immigration laws culminating with the 1965 Immigration Act Filled with narratives featuring such renowned Chinese immigrants as I M Pei *The Good Immigrants* examines the shifts in immigration laws and perceptions of cultural traits that enabled Asians to remain in the United States as exemplary productive Americans *Locating Neoliberalism in East Asia* Bae-Gyoon Park, Richard Child Hill, Asato Saito, 2011-12-27 *Locating Neoliberalism in East Asia* Neoliberalizing Spaces in Developmental States examines the influence of neo liberal ideologies on urban and regional policies and practices in several Asian Pacific nations Represents one of the few studies of neoliberal changes in East Asia one of the most important topics in social science research over the past two decades Considers the Asian perspective by focusing on readings from Asian experts Pays special attention to the spatial dimension of the East Asian neoliberalization Examines the influence of neo liberal ideologies on urban and regional policies and practices in several Asian Pacific nations Explores the evolving relationship between the two political economies **The Last Good Neighbor** Eric Zolov, 2020-05-08 In *The Last Good Neighbor* Eric Zolov presents a revisionist account of Mexican domestic politics and international relations during the long 1960s tracing how Mexico emerged from the shadow of FDR's Good Neighbor policy to become a geopolitical player in its own right during the Cold War Zolov shows how President Adolfo Lopez Mateos 1958-1964 leveraged Mexico's historical ties with the United States while harnessing the left's passionate calls for solidarity with developing nations in a bold attempt to alter the course of global politics During this period Mexico forged relationships with the Soviet Bloc took positions at odds with US interests and entered the scene of Third World internationalism Drawing on archival research from Mexico the United States and Britain Zolov gives a broad perspective on the multitudinous transnational forces that shaped Mexican political culture in ways that challenge standard histories of the period *The Last Decade of the Cold War* Olav Njolstad, 2004-08-02 The last decade of the Cold War witnessed the transformation of world politics with the collapse of one party Communist rule in Eastern Europe and the Soviet Union This book explains how it happened and why *McDougal Littell World History: Patterns of Interaction* McDougal-Littell Publishing Staff, 2004-03-11 **Beyond the Divide** Simo Mikkonen, Pia Koivunen, 2015-10-01 Cold War history has emphasized the division of Europe into two warring camps with separate ideologies and little in common This volume presents an alternative perspective by suggesting that there were transnational networks bridging the gap and connecting like minded people on both sides of the divide Long before the fall of the Berlin Wall there were institutions organizations and individuals who brought people from the East and the West together joined by shared professions ideas and sometimes even through marriage The volume aims at proving that the post WWII histories of Western and Eastern Europe were entangled by looking at cases involving France Denmark Poland Romania Switzerland and others **Peter Lilienthal** Claudia Sandberg, 2021-07-16 Best known for his 1979 film *David* Peter Lilienthal was an unusual figure within postwar filmmaking circles A child refugee from Nazi Germany who grew up in Uruguay he was uniquely situated at the crossroads of German Jewish and Latin American cultures while his work emerged

from West German auteur filmmaking his films bore the unmistakable imprints of Jewish thought and the militant character of New Latin American cinema Peter Lilienthal is the first comprehensive study of Lilienthal's life and career highlighting the distinctively cross cultural and transnational dimensions of his oeuvre and exploring his role as an early exemplar of a more vibrant inclusive European film culture *Transnational Civil Society in China* J. Chen, 2012-09-01 This book discusses the penetration growth and operation of transnational civil society TCS in China It explores impacts on the incremental development of China's political pluralism mainly through exploring the influences of the leading TCS actors on the country's bottom up and self governing activist NGOs that have sprung up spontaneously in terms of capacities strategies leadership and political outlook as a result of complex interactions between the two sectors **The Civilian-Military Divide** Louise Stanton, 2009-09-23 This book examines how U S domestic institutions stand up to global threats and whether intelligence sharing across military and civilian law enforcement barriers is legal The U S Constitution is designed to distribute power in order to prevent its concentration and in particular it draws clear lines between the responsibilities of the military and those of civilian law enforcement But the new global threat paradigm requiring responses both abroad and at home calls out for military and civilian intelligence gathering to work in tandem The Civil Military Divide Obstacles to the Integration of Intelligence in the United States looks at historic and legal ramifications of such efforts Louise Stanton's thought provoking work sums up the current state of U S intelligence gathering at all levels of government It then looks at the range of recommendations for overhauling our intelligence efforts in the context of the U S Constitution to assess what may or may not be constitutionally supportable At issue are three long established often reaffirmed principles the separation of powers the federalist system that gives the U S government precedence over states and the separation of the civilian and military sectors **Catastrophic Success** Alexander B. Downes, 2021-12-15 In *Catastrophic Success* Alexander B Downes compiles all instances of regime change around the world over the past two centuries Drawing on this impressive data set Downes shows that regime change increases the likelihood of civil war and violent leader removal in target states and fails to reduce the probability of conflict between intervening states and their targets As Downes demonstrates when a state confronts an obstinate or dangerous adversary the lure of toppling its government and establishing a friendly administration is strong The historical record however shows that foreign imposed regime change is in the long term neither cheap easy nor consistently successful The strategic impulse to forcibly oust antagonistic or non compliant regimes overlooks two key facts First the act of overthrowing a foreign government sometimes causes its military to disintegrate sending thousands of armed men into the countryside where they often wage an insurgency against the intervener Second externally imposed leaders face a domestic audience in addition to an external one and the two typically want different things These divergent preferences place imposed leaders in a quandary taking actions that please one invariably alienates the other Regime change thus drives a wedge between external patrons and their domestic protégés or between protégés and their people *Catastrophic Success*

provides sober counsel for leaders and diplomats Regime change may appear an expeditious solution but states are usually better off relying on other tools of influence such as diplomacy Regime change Downes urges should be reserved for exceptional cases Interveners must recognize that absent a rare set of promising preconditions regime change often instigates a new period of uncertainty and conflict that impedes their interests from being realized **Beginning at the End** Robert Stilling, 2018-06-11 Robert Stilling shows how aestheticism s decadence became a key idea in postcolonial thought describing the failures of revolutionary nationalism and asserting cosmopolitanism in poetry and art Breaking down the boundaries around decadent literature he takes it outside Europe and emphasizes the global reach of its imaginative transgressions Development Disrupted Ruth Elizabeth Gordon, 2022-08-04 Although the impact of rapid technological change is often discussed in relation to the Global North this book explores its effects on the development of the Global South By tracing the discourse and practice of international development in the twentieth century Ruth E Gordon offers necessary context to current changes in the global hierarchy The book explores the situation of the Global South within the international legal political and economic order how current development discourse and practice engages modernization efforts and how technology can bring about significant economic and societal change for middle and low income nations It offers a balanced account of the positive and negative impacts of technological change on the Global South from mobile phones allowing access to knowledge to robotics reducing employment opportunities This book demonstrates that for the Global South technology is making more things both conceivable and achievable
