throughout with easy to understand line art and diagrams SAS Desert Survival Barry Davies,2012-12-10 Anyone venturing into the desert either by crossing on foot vehicle or in an aircraft other than a commercial flight should be prepared Desert regions are those least likely to have an easily available source of water Nevertheless the survivor must find a water supply or they will die No matter how abundant the rest of your survival resources are without water your time is limited To travel or stay put is one of the great dilemmas any survivor must face The factors governing any decision should be based on where you are your chances of survival if you stay put where you intend moving to and the related hazards in getting there Without communications it is difficult to assess whether there will be a rescue attempt and even if there is it would be presumptive to believe that they will locate you Additionally having the physical and mental ability plus the resources to travel and reach a given point accurately is also a major factor The SAS Guide to Desert Survival prepares the traveler for any situation they may find themselves in while venturing across desert and arid areas It will explain the need for an immediate plan as time will be against you as well as how to dress for the ultimate protection from the sun and the cold yes deserts get very cold at night The book will show you how and when to travel as well as how to navigate a route to safety The desert has two main advantages the sun and the general clearness of visibility a simple heliograph will flash a signal to both ground and air rescue services up to twenty five miles away **SAS Survival Handbook, Revised Edition** John 'Lofty' Wiseman,2009-03-03 For Any Climate in Any Situation Newly updated to reflect the latest in survival knowledge and technology the internationally bestselling SAS Survival Handbook is the definitive resource for all campers hikers and outdoor adventurers From basic campcraft and navigation to fear management and strategies for coping with any type of disaster this complete course includes Being prepared Understanding basic survival needs and preparing essentials such as a pocket survival kit Making camp Finding the best location constructing the appropriate shelter organizing camp and creating tools Food What to eat what to avoid where to find it and how to prepare it First aid A comprehensive course in emergency wilderness medicine including how to maximize survival in any climate or when injured Disaster survival How to react in the face of increasingly frequent natural disasters and hostile situations and how to survive at home if all services and supplies are cut off SAS Jungle Survival Barry Davies,2013-01-08 When we think of jungles we often think of a densely forested area with thick foliage this is what is known as a primary jungle But jungles can also include swamps grasslands and cultivated areas Primary jungles can fall into the category of either a tropical rain forest or a deciduous forest depending on the types of trees and plants found growing there A tropical rain forest is typified by having tall trees whose upper branches interlock to form canopies Yet of all the environments in which man has to survive the jungle offers the best chance The SAS have operated in the jungle for years sometimes staying in the forest for months at a time They developed a technique whereby they had two sets of clothing one for daytime use and one for night Just before they went to sleep they would change from their wet clothing which was normally hung under the shelter to dry out In the morning they would change from

their dry clothing and put on the wet. It is an uncomfortable change but one that guaranteed a good night's sleep in dry clothing. The SAS Guide to Jungle Survival will teach the reader to come to terms with the jungle environment, understand it and work with it as opposed to fighting it. The jungle forest can provide shelter, food and water in abundance, and this book will show you how. If the jungle offers any problems, it is with disease and wild animals. The SAS Guide to Jungle Survival will show you how to avoid and resist both and come out alive.
