to any problem that obstructs our achievements but the time has come to ignore the easy answers that are not really going to take us anywhere Nothing is built from nothing every goal requires sustained effort and quick success is harmful and unreal The success or rather the lack of success is a direct consequence of our daily decisions which give direction to our life This book is about how to pursue our goals and overcome any kind of obstacle The compound effect is therefore an action plan that anyone can take advantage of to be as successful as Arnold Schwarzenegger or Michael Phelps This is through making small changes in everyday decisions to generate other larger long term changes Ultimately it's about taking responsibility for our own satisfaction and happiness

INTRODUCTION The modern world is obsessed with wealth health and eternal youth and aims to sell us fantastic remedies backed by unreal testimonies of people who achieved success by almost miraculous means Among all this bombardment of information or misinformation we have found ourselves lost in confusion which does not allow us to see where the pillars of success really are To start depurating we must be aware that this is a slow process that will require a long period of practice The objective is to transform this constant change into habits that become automatic to the point where their practice no longer requires great effort This can only be done over time But the advantage is that the changes consist of very simple things such as spending a greater part of the day on healthy pastimes instead of sitting in front of the television All of the above also has the ability to determine our failure It is almost impossible for us to achieve a radical change overnight One day we can wake up feel especially good and prone to a positive attitude that motivates us to face our fears and approach one more step to our goals However the next morning may not be so simple and we may wish to postpone the change until next week hoping to feel better again That is why when we aim for sudden changes perseverance will not appear and without it we will not be able to move forward Therefore the problem is not usually with our attitude nor the level of difficulty of the objectives that we set but it is with our approach which we must redirect from negative habits towards positive habits This implies that our negative mentality for example rooted in the concerns changes towards a positive one A small change that we can begin to make to help ourselves is to disconnect from all those false means and start listening to motivational means or surround ourselves with inspiring people in our environment This will help us to make an in depth revision of our habits to develop an efficient plan that allows us to improve ourselves and make the small daily decisions that will re shape our day to day life
