reference for researching adult and lifelong education and learning With contributions from scores of established and newer scholars from six continents the volume covers a diverse range of geopolitical and social territories across the world Drawing on the multiple heritages that underpin research on education and learning in adulthood this Handbook addresses the inner tensions between adult education adult learning lifelong education and lifelong learning by using current research and theorizations from disciplinary backgrounds including philosophy psychology biology and neuroscience anthropology sociology history political science and economics It provides an explicit discussion of the differences and tensions between adult and lifelong education and learning and locates these in different policy and historical contexts theories and practices It explores a variety of discipline based theoretical perspectives and highlights how these have influenced and been influenced by research in the education and learning of adults The Handbook also explores the inevitable frictions and dilemmas these present and carefully examines the role of the international dimension in researching education and learning in formal non formal and informal contexts beyond traditional schooling This state of the art comprehensive Handbook is the first of its kind to explore adult education lifelong education and lifelong learning fully as distinct activities on an international scale It will be an indispensable reference resource for students of education at undergraduate and postgraduate levels and for academic researchers professionals and policy makers concerned with adult and community education further and vocational education or work based training and human resource development

Sustainability in Public Procurement, Corporate Law and Higher Education Lela Melon, 2023-12-12 Contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices This book provides a new viewpoint and approach of simultaneously regulating seemingly non connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes It addresses diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement private market transaction and in educating future business leaders and legal experts by incorporating sustainable concerns as the underlying guiding principles of their conduct It translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields The underlying assumption is that a simultaneous action in the three respective fields of public procurement corporate law and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices The book furthers the idea of policy coherence by building upon the findings in the field of public procurement corporate law and practice and higher education curricula By identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the EU level the book calls for further changes in the respective fields as well as for considering

the spillover effects of these policies on other fields *The Politics of Climate Change under President Obama* Hugh Atkinson, 2017-10-31 The last two decades have witnessed an ever growing partisan divide in US politics over climate change and global warming Significant elements in the Republican Party became openly hostile to the scientific evidence and following the election of George W Bush legislative action at the federal level effectively ground to a halt This opened up space at the state and local level to develop climate change policies with cities such as Chicago San Francisco and New York implementing a number of initiatives that brought real and substantive developments The election of Barack Obama in 2008 seemed to open new possibilities for federal and global leadership once more and whilst the Obama administration has been criticised for a somewhat contradictory approach to the issue at times there were nonetheless a number of substantive policy developments Through a substantive and detailed analysis of the politics of climate change this book places the evolution of US climate policy within broader debates on the nature of politics in the US and argues that there exists a latent potential often obscured by the complexities of its political system for America to act as a world leader on the issue This work will appeal particularly to students and scholars in American Politics but will also prove useful to those in the fields of general Politics climate change sustainability and environmental studies The Role of the human dimension in promoting education for sustainable development at the regional level Jana Dlouhá, Rodrigo Lozano, Philip Vaughtner, Andrew Reeves, Kiran Banga Chhokar, Clemens Mader, Roger Petry, Detlev Lindau-Bank, 2023-10-27 Implementing Sustainability in the Curriculum of Universities Walter Leal Filho, 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff It has been prepared against this background to identify ways to better teach about sustainability issues in a university context It contains a set of papers presented at a Symposium with the same title held at Manchester Metropolitan University UK in March 2017 The event was attended by a number of institutions of higher education active in this field It involved researchers in the field of sustainable development in the widest sense from business and economics to arts and fashion administration environment languages and media studies Sustainability is seldom systematically embedded in the curriculum at higher education institutions Yet proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening The aims of this book are i to provide teaching staff at universities active and or interested in teaching sustainable development themes with an opportunity to document and disseminate their works i e curriculum innovation empirical work activities case studies practical projects ii to promote information ideas and experiences acquired in the execution of teaching courses especially successful initiatives and good practice iii to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching Last but not least a further aim of this book prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and

Transfer Centre WSD RTC is to catalyse a debate on the need to promote sustainable development teaching today

Democracy and Decency Paul R. Carr,P. L. Thomas,Brad J. Porfilio,Julie A. Gorlewski,2016-02-01 Democracy can mean a range of concepts covering everything from freedoms rights elections governments processes philosophies and a panoply of abstract and concrete notions that can be mediated by power positionality culture time and space Democracy can also be translated into brute force hegemony docility compliance and conformity as in wars will be decided on the basis of the needs of elites or major decisions about spending finite resources will be the domain of the few over the masses or people will be divided along the lines of race ethnicity class religion etc because it is advantageous for maintaining exploitative political systems in place to do so Often these frameworks are developed and reified based on the notion that elections give the right to societies or segments of societies to install regimes institutions and operating systems that are then supposedly legitimated and rendered infinitely just because formal power resides in the hands of those dominating forces This book is interested in advancing a critical analysis of the hegemonic paradigm described above one that seeks higher levels of political literacy and consciousness and one that makes the connection with education What does education have to do with democracy How does education shape influence impinge on impact negate facilitate and or change the context contours and realities of democracy How can we teach for and about democracy to alter and transform the essence of what democracy is and importantly what it should be This book advances the notion of decency in relation to democracy and is underpinned by an analysis of meaningful critically engaged education Is it enough to be kind nice generous and hopeful when we can also see signs of rampant entrenched and debilitating racism sexism poverty violence injustice war and other social inequalities If democracy is intended to be a legitimating force for good how does education inform democracy What types of knowledge experience analysis and being are helpful to bring about newer more meaningful and socially just forms of democracy Throughout some twenty chapters from a range of international scholars this book includes three sections Constructing Meanings for Democracy and Decency Justice for All as Praxis and Social Justice in Action for Democracy Decency and Diversity International Perspectives The underlying thread that is interwoven through the texts is a critical reappraisal of normative hegemonic interpretations of how power is infused into the educational realm and importantly how democracy can be re situated and re formulated so as to more meaningfully engage society and education **Education, Community Engagement and Sustainable Development** Nicole Blum,2012-01-13 A growing body of research has given critical attention to diverse theories and practices of environmental education and its potential contribution to addressing pressing global issues such as sustainable development and climate change While much of this work has focused on perspectives and

practices in Europe and North America this book explores environmental learning within formal education in programmes by non governmental organisations and in public education spaces in Monteverde Costa Rica The discussion also highlights the need for more research to understand the broader social and economic interactions between such efforts and the communities in which they are located
