The Collapse Of Western Civilization A View From The Future:

The Collapse of Western Civilization Naomi Oreskes, Erik M. Conway, 2014-07-01 The year is 2393 and the world is almost unrecognizable Clear warnings of climate catastrophe went ignored for decades leading to soaring temperatures rising sea levels widespread drought and finally the disaster now known as the Great Collapse of 2093 when the disintegration of the West Antarctica Ice Sheet led to mass migration and a complete reshuffling of the global order Writing from the Second People's Republic of China on the 300th anniversary of the Great Collapse a senior scholar presents a gripping and deeply disturbing account of how the children of the Enlightenment the political and economic elites of the so called advanced industrial societies failed to act and so brought about the collapse of Western civilization In this haunting provocative work of science based fiction Naomi Oreskes and Eric M Conway imagine a world devastated by climate change Dramatizing the science in ways traditional nonfiction cannot the book reasserts the importance of scientists and the work they do and reveals the self serving interests of the so called carbon combustion complex that have turned the practice of science into political fodder Based on sound scholarship and yet unafraid to speak boldly this book provides a welcome moment of clarity amid the cacophony of climate change literature

Dystopia Gregory Claeys, 2017 *Dystopia A Natural History* is the first monograph devoted to the concept of dystopia Taking the term to encompass both a literary tradition of satirical works mostly on totalitarianism as well as real despotisms and societies in a state of disastrous collapse this volume redefines the central concepts and the chronology of the genre and offers a paradigm shifting understanding of the subject Part One assesses the theory and prehistory of dystopia By contrast to utopia conceived as promoting an ideal of friendship defined as enhanced sociability dystopia is defined by estrangement fear and the proliferation of enemy categories A natural history of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms The work of Le Bon Freud and others is used to show how dystopian groups use such emotions Utopia and dystopia are portrayed not as opposites but as extremes on a spectrum of sociability defined by a heightened form of group identity The prehistory of the process whereby enemies are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft and the persecution of heresy Part Two surveys the major dystopian moments in twentieth century despotisms focussing in particular upon Nazi Germany Stalinism the Chinese Cultural Revolution and Cambodia under Pol Pot The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular Part Three examines literary dystopias It commences well before the usual starting point in the secondary literature in anti Jacobin writings of the 1790s Two chapters address the main twentieth century texts usually studied as representative of the genre Aldous Huxley's *Brave New World* and George Orwell's *Nineteen Eighty Four* The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present

Getting the Climate Science Facts Right Medani P. Bhandari, 2022-09-01. *Getting the Climate Science Facts Right* discusses climate change science with reference to the Intergovernmental Panel on Climate Change (IPCC). Addressing climate change is the most important public priority of the 21st Century. Unlike many issues, however, this issue is being driven by both science and its interface with politics. The main institution for bridging this division between science and international politics is the IPCC. As such, it is the main source of the facts from which climate change policy is developed. This book describes the ways in which the IPCC arrives at these facts and so can be sure they are complete and evidence-based. Seldom in history has science had such a direct relationship with politics. The negotiation of an international policy regime requires at its outset an agreement on the facts. In this case, the facts are scientifically complex and contentious. Governments have recognized this and have by using the IPCC set up institutional machinery to provide facts from a source and in a manner that they can accept. The way in which the IPCC functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level. Starting with a process to examine, review and debate scientific findings leading to a consensus about scientific fact, usually expressed as probabilities that the findings will hold over time, the IPCC then concludes by using the kind of consensus development mechanism that the United Nations typically uses to achieve agreements leading to the formation of policy regimes. The book examines the structure of the IPCC, its composition and its procedures in order to achieve an understanding of its role and future.

Unsafe Space Tom Slater, 2016-04-13. The academy is in crisis. Students call for speakers to be banned, books to be slapped with trigger warnings, and university to be a Safe Space free of offensive words or upsetting ideas. But as tempting as it is to write off intolerant students as a generational blip or a science experiment gone wrong, they've been getting their ideas from somewhere. Bringing together leading journalists, academics and agitators from the US and UK, *Unsafe Space* is a wake-up call. From the war on *lad* culture to the clampdown on climate sceptics, we need to resist all attempts to curtail free speech on campus. But society also needs to take a long, hard look at itself. Our inability to stick up for our founding liberal values to insist that the free exchange of ideas should always be a risky business has eroded free speech from within.

Countdown Alan Weisman, 2013-09-24 A powerful investigation into the chances for humanity's future from the author of the bestseller *The World Without Us* In his bestselling book *The World Without Us* Alan Weisman considered how the Earth could heal and even refill empty niches if relieved of humanity's constant pressures Behind that groundbreaking thought experiment was his hope that we would be inspired to find a way to add humans back to this vision of a restored healthy planet only in harmony not mortal combat with the rest of nature But with a million more of us every 4 1 2 days on a planet that's not getting any bigger and with our exhaust overheating the atmosphere and altering the chemistry of the oceans prospects for a sustainable human future seem ever more in doubt For this long awaited follow up book Weisman traveled to more than 20 countries to ask what experts agreed were probably the most important questions on Earth and also the hardest How many humans can the planet hold without capsizing How robust must the Earth's ecosystem be to assure our continued existence Can we know which other species are essential to our survival And how might we actually arrive at a stable optimum population and design an economy to allow genuine prosperity without endless growth Weisman visits an extraordinary range of the world's cultures religions nationalities tribes and political systems to learn what in their beliefs histories liturgies or current circumstances might suggest that sometimes it's in their own best interest to limit their growth The result is a landmark work of reporting devastating urgent and ultimately deeply hopeful By vividly detailing the burgeoning effects of our cumulative presence *Countdown* reveals what may be the fastest most acceptable practical and affordable way of returning our planet and our presence on it to balance Weisman again shows that he is one of the most provocative journalists at work today with a book whose message is so compelling that it will change how we see our lives and our destiny

Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene Christopher Schliephake, Evi Zemanek, 2023-02-06 *Anticipatory Environmental Hi Stories from Antiquity to the Anthropocene* studies the interplay of environmental perception and the way societies throughout history have imagined the future state of nature and the environments in which coming generations would live What sorts of knowledge were and are involved in outlining future environments What kinds of texts and narrative strategies were and are developed and modified over time How did and do scenarios and narratives of the past shape hi stories of the future This book answers these questions from a diachronic as well as a cross cultural perspective By looking at a diverse range of historical evidence that transcends stereotypical utopian and dystopian visions and allows for nuanced insights beyond the dichotomous reservoir of pastoral motifs and apocalyptic narratives the contributors illustrate the multifaceted character of environmental anticipation across the ages

After

Latour: Globalisation, Inequity and Climate Change Matthew R. Jones, Arunima S. Mukherjee, Devinder Thapa, Yingqin Zheng, 2023-12-06 This book constitutes the refereed proceedings of the IFIP WG 8.2 and WG 9.4 Joint Working Conference on After Latour Globalisation Inequity and Climate Change IFIPJWC 2023 held in Hyderabad India during December 7-8 2023. The 15 full papers presented together with 13 short papers were carefully reviewed and selected from 60 submissions. They are organized in topical sections as follows: climate change and digital sustainability; ICTs and sustainable development; IS in the education sector; privacy, trust, and surveillance; theories and methods. **Handbook on Migration and Security** Philippe Bourbeau, 2017-04-28 This Handbook provides a state-of-the-art analysis of the critically important links between migration and security in a globalising world and presents original contributions suggesting innovative and emerging frontiers in the study of the securitization of migration. Experts from different fields reflect on their respective conceptualisations of the migration security nexus and consider how an interdisciplinary and multifaceted dialogue can stimulate and enrich our understanding of the securitisation of migration in the contemporary world. **Handbook of the Anthropocene** Nathanaël Wallenhorst, Christoph Wulf, 2023-08-21 This Handbook is a collection of contributions of more than 300 researchers who have worked to grasp the Anthropocene, this new geological epoch characterised by a modification of the conditions of habitability of the Earth for all living things in its biogeophysical and socio-political reality. These researchers also sought to define a historical and prospective anthropology that integrates social, economic, cultural, and political issues as well as, of course, environmental ones. What are the anthropological changes needed to ensure that our human adventure will be able to continue in the Anthropocene? And what are the educational and political issues involved? Anthropocene is fast becoming a widely used term, but thus far there has been no reference work explaining the thoughts of the greatest experts of the present day on this subject at the intersection of biogeophysical and socio-political knowledge. A scientific and political concept, but which is also the conceptual vehicle for conveying the scientific community's sense of concern, this complex term is explained by international experts as they reflect on scientific arguments taking place in earth system science, the social sciences, and the humanities. What these researchers from different disciplines have in common is a healthy concern for the future and how to prepare for it in the Anthropocene and also the identification of possible anthropological changes. This Handbook encourages readers to immerse themselves in reflections on the human adventure through descriptions of our differing heritages and the future that is in the process of being written. **Humanity the Next 50 and 500 Years** Eddy Lee Waichoi, 2023-09-18 Humanity stands at a crossroads. The path we choose could lead either to the collapse of civilization with horrendous suffering to follow or to a new renaissance where humankind reaches for the stars. The outcome hinges on our decisions and actions or lack thereof taken now and in the coming decades. It's a daunting prospect. Yet ready or not, we are the chosen generation and there's no escape from the fierce urgency of now. In this book, Lee Waichoi Eddy, former Senior Scientific Officer of the Hong Kong Royal Observatory and renowned science writer, begins with a comprehensive yet

insightful survey of civilization's evolution since the Agricultural Revolution. He explains how we have arrived at this juncture in history before unveiling key features of the contemporary scene and highlighting the formidable challenges ahead. Using the next 50 and 500 years as reference points, he poses relevant questions and offers bold predictions for humanity under various scenarios. Both pessimists and optimists will find ample food for thought here, perhaps even enough to last a lifetime. Abraham Lincoln once said, "If we could first know where we are and whither we are tending, we could then better judge what to do and how to do it." This book serves as an indispensable tool to help us understand where we are and whither we are tending. It will transform the way you look at the world and offer valuable insights on how we should shape our future.

The Child to Come Rebekah Sheldon, 2016-11-01. *Generation Anthropocene: Storms of My Grandchildren*. Our Children's Trust. Why do these and other attempts to imagine the planet's uncertain future return us again and again to the image of the child? In *The Child to Come*, Rebekah Sheldon demonstrates the pervasive conjunction of the imperiled child and the threatened Earth and blisteringly critiques the logic of catastrophe that serves as its motive and its method. Sheldon explores representations of this perilous future and the new figurations of the child that have arisen in response to it. Analyzing catastrophe discourse from the 1960s to the present, books by Joanna Russ, Margaret Atwood, and Cormac McCarthy, films and television series including *Southland Tales*, *Battlestar Galactica*, and *Children of Men*, and popular environmentalism, Sheldon finds the child standing in the place of the human species, coordinating its safe passage into the future through the promise of one more generation. Yet she contends the child figure emerges bound to the very forces of nonhuman vitality he was forged to contain. Bringing together queer theory, ecocriticism, and science studies, *The Child to Come* draws on and extends arguments in childhood studies about the interweaving of the child with the life sciences. Sheldon reveals that neither life nor the child are what they used to be. Under pressure from ecological change, artificial reproductive technology, genetic engineering, and the neoliberalization of the economy, the queerly human child signals something new: the biopolitics of reproduction. By promising the pliability of the body's vitality, the pregnant woman and the sacred child have become the paradigmatic figures for twenty-first-century biopolitics. *Italian Science Fiction and the Environmental Humanities* Daniel A. Finch-Race, Emiliano Guaraldo, Marco Malvestio, 2023-11-15. This volume explores Italian science fiction from the nineteenth century to the twenty-first, covering literary texts, films, music, and visual works by figures as diverse as Maria Rosa Cutrufelli, Peter Kolosimo, Primo Levi, Antonio Margheriti, Gilda Musa, and Roberto Vacca. It broadens the horizons of both Italian studies and the environmental humanities by addressing a long neglected genre and expands our understanding of relations between the ecological, the imaginary, and the sociopolitical. The chapters draw on a variety of methodological frameworks, including animal studies, ecocriticism, ecofeminism, eco-media studies, energy humanities, and posthumanism. The reader will gain insights into consequential topics such as anthropocentrism, speciesism, ecomodernist thought, environmental justice, struggles at the planetary and regional level, non-human, and new materialist ontologies, utopian, dystopian.

The America Syndrome Betsy Hartmann,2017-05-23 Has apocalyptic thinking contributed to some of our nation s biggest problems inequality permanent war and the despoiling of our natural resources From the Puritans to the present historian and public policy advocate Betsy Hartmann sheds light on a pervasive but until now invisible theme shaping the American mindset apocalyptic thinking or the belief that the end of the world is nigh Hartmann makes a compelling case that apocalyptic fears are deeply intertwined with the American ethos to our detriment In The America Syndrome she seeks to reclaim human agency and in so doing revise the national narrative By changing the way we think we just might change the world

The Shifting Global Balance of Power: Perils of a World War and Preventive Measures Dr. Yana Korobko,Mahmoud Musa,2014-06-09 Many believed that the world would remain everlastingly unchangeable in the aftermath of victory of the Allies the United States the Soviet Union China United Kingdom and France in World War II They remodeled the world map amongst themselves and affirmed that they will be guarantors of the international status quo However those who pledged to conserve peace are now breaking it leading the planet to the edge of clash This book differs from all others that dealt with possible World War III scenarios since it combines knowledge in the fields of history international relations economics sociology and psychology and philosophy Thus giving the reader a broader outlook on such matters as Potentially risky world war scenarios Dialogue between the West and Islam New emerging superpowers Psychological and Cyber Ware fare Preventive mechanisms such as early warning and preparedness operations

What is the Future? John Urry,2016-09-06 Thinking about the future is essential for almost all organizations and societies States corporations universities cities NGOs and individuals believe they cannot miss the future But what exactly is the future It remains a mystery perhaps the greatest mystery especially because futures are unpredictable and often unknowable the outcome of many factors known and unknown The future is rarely a simple extrapolation from the present In this important book John Urry seeks to capture the many efforts that have been made to anticipate visualize and elaborate the future This includes examining the methods used to model the future from those of the RAND Corporation to imagined future worlds in philosophy literature art film TV and computer games He shows that futures are often contested and saturated with different interests especially in relation to future generations He also shows how analyses of social institutions practices and lives should be central to examining potential futures and issues such as who owns the future The future seems to be characterized by wicked problems There are multiple causes and solutions long term lock ins and complex interdependencies and different social groups have radically different frames for understanding what is at stake Urry explores these issues through case studies of 3D printing and the future of manufacturing mobilities in the city and the futures of energy and climate change
