Rea,2022-04-12 There is a common but often unspoken arrogance on the part of outside observers that folk science and traditional knowledge the type developed by Native communities and tribal groups is inferior to the formal science practiced by Westerners In this lucidly written and humanistic account of the O odham tribes of Arizona and Northwest Mexico ethnobiologist Amadeo M Rea exposes the limitations of this assumption by exploring the rich ornithology that these tribes have generated about the birds that are native to their region He shows how these peoples observational knowledge provides insights into the behaviors mating habits migratory patterns and distribution of local bird species and he uncovers the various ways that this knowledge is incorporated into the communities traditions and esoteric belief systems Drawing on more than four decades of field and textual research along with hundreds of interviews with tribe members Rea identifies how birds are incorporated both symbolically and practically into Piman legends songs art religion and ceremonies Through highly detailed descriptions and accounts loaded with Native voice this book is the definitive study of folk ornithology It also provides valuable data for scholars of linguistics and North American Native studies and it makes a significant contribution to our understanding of how humans make sense of their world It will be of interest to historians of science anthropologists and scholars of indigenous cultures and folk taxonomy **Desert Falcons** J. Falconry. Notes on the Falconidae Used in India in Falconry E. Delmé Radcliffe,1872 *The Ways of the Desert* Eugène Daumas,2013-12-06 The Ways of the Desert translated from the French offers an introduction to the North African Arab nomads their way of life customs dress and religion The companion to this volume The Horses of the Sahara provides a detailed description and history of the great breeds of Arab horses While part of this book is devoted to descriptions of the various animals that are both hunted and used for hunting its appeal goes well beyond its attraction for those with a special interest in the lore of desert hunt and chase General Daumas and his major collaborator informant the Emir Abd el Kader together provide sensitive insights into the total culture of the North African desert people of the nineteenth century Both spiritual and material aspects of desert life are encompassed in this work which ranges from translations of Arab poetry to descriptions of the uses of the fat and remains of the ostrich The patterns of conviction and conduct described form an important part of the rich cultural heritage of the modern Maghreb nations The way of life described in this book is often presented from what comes very close to being an inside point of view Occasionally Daumas feels obliged to disapprove of

certain practices or beliefs or to criticize his Arab friends but in large part his underlying sympathy for the Arab people permits his informants to speak clearly through his pen General Melchior Joseph Eugene Daumas took part in the conquest of Algeria by France and for his distinguished service was named Director of the Bureau of Algerian Affairs in the French Ministry of War During the campaigns and the occupation that followed he studied and attempted to understand the native peoples with an objectivity and sympathy unusual among the colonialists of the period He recorded a way of life that has changed much since the nineteenth century and much of what he recorded has since been lost His account as well as being an important source for the historian and ethnographer provides for the general reader a fascinating record of the vanishing ways of the desert
