World War II Julie R. Strathman, 1994 Includes activities based on Number the stars by Lois Lowry and Sadako and the thousand paper cranes by Eleanor Coerr *You Shall Tell Your Children* Liora Gubkin, 2007-11-05

Passover is among the most widely observed holidays for American Jews During this festival of redemption Jewish families retell the biblical story of Exodus using a ritual book known as a haggadah often weaving modern tales of oppression through the biblical narrative References to the Holocaust are some of the most common additions to contemporary haggadot However the parallel between ancient and modern oppression which seems obvious to some raises troubling questions for many others Is it possible to find any redemptive meaning in the Nazi genocide Are we adding value to this unforgivable moment in history Liora Gubkin critiques commemorations that violate memory by erasing the value of everyday life that was lost and collapse the diversity of responses both during the Shoah and afterward She recounts oral testimonies from Holocaust survivors cites references to the holiday in popular American culture and analyzes examples of actual haggadot Ultimately Gubkin concludes that it is possible and important to make a space for Holocaust commemoration all the time recognizing that haggadot must be constantly revisited and performed

Holocaust vs. Popular Culture Mahitosh Mandal, Priyanka Das, 2023-08-10 Holocaust vs Popular Culture debates and deconstructs the binary responses to the representation of the Holocaust in European and non European forms of Popular Culture The binary is defined in terms of incompatibility between the Holocaust and Popular Culture on the one hand and the universalization of the Holocaust memory through Popular Culture on the other The book does emphasize the anti representation argument Nevertheless the authors make a case for a productive understanding of Holocaust Popular Culture as contributing to the expansion of Holocaust studies as well as cultural studies in the transnational context The book theorizes Popular Culture in broad terms and highlights the diversity of Holocaust Popular Culture mainly but not exclusively produced in the twenty first

century This interdisciplinary collection covers a wide variety of Popular Culture genres including language literature films television shows soap operas music dance social media advertisements comics graphic novels videogames and museums It studies the mis representation of the Holocaust trauma not only across genres but also across nations Western and Asian and generations from testimonial remembrance to post memory This book will be of interest to students and scholars from a wide range of disciplines and subjects including Popular Culture Holocaust studies cultural studies genocide studies postcolonial and transnational studies media and film studies visual culture games studies race and ethnicity studies memory studies and Jewish studies

Suffer the Little Children Jodi Eichler-Levine, 2015-04-08 Examines classic and contemporary Jewish and African American children's literature Through close readings of selected titles published since 1945 Jodi Eichler Levine analyzes what is at stake in portraying religious history for young people particularly when the histories in question are traumatic ones In the wake of the Holocaust and lynchings of the Middle Passage and flight from Eastern Europe's pogroms children's literature provides diverse and complicated responses to the challenge of representing difficult collective pasts In reading the work of various prominent authors including Maurice Sendak Julius Lester Jane Yolen Sydney Taylor and Virginia Hamilton Eichler Levine changes our understanding of North American religions She illuminates how narratives of both suffering and nostalgia graft future citizens into ideals of American liberal democracy and into religious communities that can be understood according to recognizable notions of reading domestic respectability and national sacrifice If children are the idealized recipients of the past what does it mean to tell tales of suffering to children and can we imagine modes of memory that move past utopian notions of children as our future *Suffer the Little Children* asks readers to alter their worldviews about children's literature as an innocent enterprise revisiting the genre in a darker and more unsettled light

Exterior Differential Systems Robert L. Bryant, S.S. Chern, Robert B. Gardner, Hubert L. Goldschmidt, P.A.

Griffiths, 2013-06-29 This book gives a treatment of exterior differential systems It will include both the general theory and various applications An exterior differential system is a system of equations on a manifold defined by equating to zero a number of exterior differential forms When all the forms are linear it is called a pfaffian system Our object is to study its integral manifolds i.e. submanifolds satisfying all the equations of the system A fundamental fact is that every equation implies the one obtained by exterior differentiation so that the complete set of equations associated to an exterior differential system constitutes a differential ideal in the algebra of all smooth forms Thus the theory is coordinate free and computations typically have an algebraic character however even when coordinates are used in intermediate steps the use of exterior algebra helps to efficiently guide the computations and as a consequence the treatment adapts well to geometrical and physical problems A system of partial differential equations with any number of independent and dependent variables and involving partial derivatives of any order can be written as an exterior differential system In this case we are interested in integral manifolds on which certain coordinates remain independent The corresponding notion in exterior differential systems is the independence condition certain pfaffian forms remain linearly independent Partial differential equations and exterior differential systems with an independence condition are essentially the same object
