Braddick, Phil Withington, 2017 An outstanding collection bringing together some of the leading historians of this period with some of the field's rising stars which examines key issues in popular politics the negotiation of

power strategies of legitimation and the languages of politics One of the most notable currents in social cultural and political historiography is the interrogation of the categories of elite and popular politics and their relationship to each other as well as the exploration of why and how different sorts of people engaged with politics and behaved politically While such issues are timeless they hold a special importance for a society experiencing rapid political and social change like early modern England No one has done more to define these agendas for early modern historians than John Walter His work has been hugely influential and at its heart has been the analysis of the political agency of ordinary people The essays in this volume engage with the central issues of Walter's work ranging across the politics of poverty dearth and household popular political consciousness and practice more broadly and religion and politics during the English revolution This outstanding collection bringing together some of the leading historians of this period with some of the field's rising stars will appeal to anyone interested in the social cultural and political history of early modern England or issues of popular political consciousness and behaviour more generally MICHAEL J BRADDICK is professor of history at the University of Sheffield PHIL WITHINGTON is professor of history at the University of Sheffield CONTRIBUTORS Michael J Braddick J C Davis Amanda Flather Steve Hindle Mark Knights John Morrill Alexandra Shepard Paul Slack Richard M Smith Clodagh Tait Keith Thomas Phil Withington Andy Wood Keith Wrightson *A Second Supplement to the Catalogue of Books in the Signet Library. 1882-1887* Signet Library (Great Britain), 1891 *Geographies of an Imperial Power* Jeremy Black, 2018-01-06 From explorers tracing rivers to

navigators hunting for longitude spatial awareness and the need for empirical understanding were linked to British strategy in the 1700s This strategy in turn aided in the assertion of British power and authority on a global scale In this sweeping consideration of Britain in the 18th century Jeremy Black explores the interconnected roles of power and geography in the creation of a global empire Geography was at the heart of Britain's expansion into India its response to uprisings in Scotland and America and its revolutionary development of railways Geographical dominance was reinforced as newspapers stoked the fires of xenophobia and defined the limits of cosmopolitan Europe as compared to the barbarism beyond Geography provided a system of analysis and classification which gave Britain political cultural and scientific sovereignty Black considers geographical knowledge not just as a tool for creating a shared cultural identity but also as a key mechanism in the formation of one of the most powerful and far reaching empires the world has ever known **Stuart Succession**

Literature Paulina Kewes, Andrew McRae, 2019 Moments of royal succession which punctuate the Stuart era 1603 1714 occasioned outpourings of literature Writers including most of the major figures of the seventeenth century from Jonson Daniel and Donne to Marvell Dryden and Behn seized upon these occasions to mark the transition of power to reflect upon the political structures and values of their nation and to present themselves as authors worthy of patronage and recognition This volume of essays explores this important category of early modern writing It contends that succession literature warrants attention as a distinct category appreciated by contemporaries acknowledged by a number of scholars but never

investigated in a coherent and methodical manner it helped to shape political reputations and values across the period Benefitting from the unique database of such writing generated by the AHRC funded Stuart Successions Project the volume brings together a distinguished group of authors to address a subject which is of wide and growing interest to students both of history and of literature It illuminates the relation between literature and politics in this pivotal century of English political and cultural history Interdisciplinary in scope the volume will be indispensable to scholars of early modern British literature and history as well as undergraduates and postgraduates in both fields

The Devil and the Sacred in English Drama, 1350-1642 John D. Cox,2000-10-17 John Cox tells the intriguing story of stage devils from their earliest appearance in English plays to the closing of the theatres by parliamentary order in 1642 The book represents a major revision of E K Chambers ideas of stage devils in *The Medieval Stage* 1903 arguing that this is not a history of gradual secularization as scholarship has maintained for the last century but rather that stage devils were profoundly shaped from the outset by the assumptions of sacred drama and retained this shape virtually unchanged until the advent of permanent commercial theatres near London The book spans both medieval and Renaissance drama including the medieval Mystery cycles on the one hand through to plays by Greene Marlowe Shakespeare 1 and 2 Henry VI Jonson Middleton and Davenant An appendix lists all known devil plays in English from the beginning to 1642
