How to Facilitate Meaningful Classroom Conversations across Disciplines, Grade Levels, and Digital Platforms Michael B. Sherry, 2020-12-02 How can teachers facilitate meaningful classroom conversations in which students engage in shared inquiry building on what others have written or said even to disagree Such discussions can have many benefits students can learn from each other can bring their out of school ways of talking into classroom dialog can make evidence based collaborative arguments and can begin to communicate like historians scientists or other members of disciplinary communities Yet classroom discussions often fail teaching students implicitly that they have little to learn from school or each other that their home language practices are not welcome that the loudest voice wins the argument and that academic discourse is as mystifying and alien as the views of anyone who disagrees with them Outside the classroom dialog has never been more important From climate change summits or peace talks among neighboring nations to clashes between rival ethnic groups or political party mudslinging to workplace conversations or a traffic stop on a dark street we must learn to bring our own and others words into relationship with integrity or suffer the consequences This book offers concepts concrete classroom examples and activities for teachers and students to transform classroom conversations into successful discussions across disciplines grade levels and digital platforms

The Oxford Handbook of African American Language Sonja Lanehart, 2015-05-04. The goal of The Oxford Handbook of African American Language is to provide readers with a wide range of analyses of both traditional and contemporary work on language use in African American communities in a broad collective. The Handbook offers a survey of language and its uses in African American communities from a wide range of contexts, organized into seven sections: Origins and Historical Perspectives; Lexis and Variation; Structure and Description; Child Language Acquisition and Development; Education; Language in Society; and Language and Identity. It is a handbook of research on African American Language (AAL) and as such provides a variety of scholarly perspectives that may not align with each other, as is indicative of most scholarly research. The chapters in this book interact with one another as contributors frequently refer the reader to further elaboration on and references to related issues and connect their own research to related topics in other chapters within their own sections, and the handbook more generally to create dialogue about AAL, thus affirming the need for collaborative thinking about the issues in AAL research. Though the Handbook does not and cannot include every area of research, it is

meant to provide suggestions for future work on lesser studied areas e g variation heterogeneity in regional social and ethnic communities by highlighting a need for collaborative perspectives and innovative thinking while reasserting the need for better research and communication in areas thought to be resolved
