Tame A Wild Human:

The Cambridge Companion to Ancient Greek Political Thought Stephen G. Salkever, 2009-04-27 A guide to the central texts and problems in ancient Greek political thought from Homer through the Stoics and Epicureans *Stranger's Knowledge* Xavier Marquez, 2012-06-07 The Statesman is a difficult and puzzling Platonic dialogue In A Stranger's Knowledge Marquez argues that Plato abandons here the classic idea prominent in the Republic that the philosopher qua philosopher is qualified to rule Instead the dialogue presents the statesman as different from the philosopher the possessor of a specialist expertise that cannot be reduced to philosophy The expertise is of how to make a city resilient against internal and external conflict in light of the imperfect sociality of human beings and the poverty of their reason This expertise however cannot be produced on demand one cannot train statesmen like one might train carpenters Worse it cannot be made acceptable to the citizens or operate in ways that are not deeply destructive to the city's stability Even as the political community requires his knowledge for its preservation the genuine statesman must remain a stranger to the city Marquez shows how this impasse is the key to understanding the ambiguous reevaluation of the rule of law that is the most striking feature of the political philosophy of the Statesman The law appears here as a mere approximation of the expertise of the inevitably absent statesman dim images and static snapshots of the clear and dynamic expertise required to steer the ship of state across the storms of the political world Yet such laws even when they are not created by genuine statesmen can often provide the city with a limited form of cognitive capital that enables it to preserve itself in the long run so long as citizens and especially leaders retain a philosophical attitude towards them It is only when rulers know that they do not know better than the laws what is just or good and yet want to know what is just and good that the city can be preserved The dialogue is thus in a sense the vindication of the philosopher king in the absence of genuine political knowledge **Harvard Oriental Series**, 1914 **The Crusader**, 1923 *The Yoga-system of Patañjali* Patañjali, 1927 **Aristotle on Knowledge and Learning** David Bronstein, 2016 David Bronstein sheds new light on Aristotle's Posterior Analytics one of the most important and difficult works in the history of Western philosophy He argues that it is coherently structured around two themes of enduring philosophical interest knowledge and learning and goes on to highlight Plato's influence on Aristotle's text Genocide and Human Rights J. Roth, 2005-07-27 Genocide is evil or nothing could be It raises a host of questions about humanity rights justice and reality which are key areas of concern for philosophy Strangely however philosophers have tended to ignore genocide Even more problematic philosophy and philosophers bear more responsibility for genocide than they have usually admitted In *Genocide and Human Rights A Philosophical Guide* an international group of twenty five contemporary philosophers work to correct those deficiencies by showing how philosophy can and should respond to genocide particularly in ways that defend human rights *Self-Domestication and Human Evolution* Antonio Benítez-Burraco, Vera Kempe, Zanna Clay, 2020-10-23 This eBook is a collection of articles from a Frontiers Research Topic

When a Human Gives Birth to a Raven Rafael Rachel Neis, 2023-06-14 This book investigates rabbinic treatises relating to animals humans and other lifeforms Through an original analysis of creaturely generation and species classification by late ancient Palestinian rabbis and other thinkers in the Roman empire Rafael Rachel Neis shows how rabbis blurred the lines between the human and other beings This they did even as they were intent on classifying creatures and delineating the contours of the human Recognizing that life proliferates via multiple mechanisms beyond sexual copulation between two heterosexual male and female individuals of the same species the rabbis produced intricate alternatives This expansive view of generation included humans Likewise in parsing the variety of creatures the rabbis attended to the overlaps and resemblances across seemingly distinct species upsetting in turn unmitigated claims of human distinctiveness Intervening in conversations in animal studies queer theory trans theory and feminist science studies When a Human Gives Birth to a Raven provincializes sacrosanct ideals of reproduction in favor of a broader range of generation kinship and species offering powerful historical alternatives to the paradigms associated with so called traditional ideas

a phenomenological exploration of the relationship between long distance hiking in this case hiking the Appalachian Trail and spiritual pilgrimage This book shows the way the Appalachian Trail concretizes existential connections between the hikers spiritual experiences and intersubjective relationships with various constituents on and around the trail mountainous wilderness its variation of flora fauna geology and watershed and social interactions with fellow hikers and with communities near the trail Redick contrasts spiritual rambling with other approaches to hiking such as scenic hikes where an experience of landscape is the focus or a series of other aesthetic encounters that involve hikers connection with nature This book interprets the Appalachian Trail as a site of spiritual journey and those who hike the wilderness trail as contemporary pilgrims

Beyond Identities: Human Becomings in Weirding Worlds Jim Dator,2022-08-31 This book is an argument for moving beyond culturally historically ethnically biologically grounded identity as the necessary foundation of an authentic self It highlights examples of people who are attempting to inhabit identities they feel are more appropriate to themselves by deploring the damage done via claims about authentic identity The sole theme of this book is becoming beyond identity We are not fixed human beings but rather perpetually dynamic human becomings As intelligence is enabled or recognized beyond the merely human we should welcome our continuing evolution from homosapiens sapiens into many varieties of intelligences on Earth and the cosmos This book builds from tiny ripples into a tsunami of examples from conventional identity studies to Confucian human becomings to apotemnophilia to DIY biohacking to cyborgs to artefacts to hiveminds to intelligence in animals plants and fungi from the Holocene through the beginnings of the precarious climate change driven Anthropocene Epoch with hints far beyond and throughout the cosmos From a lifetime of work in future studies anticipation science and space studies the author balances frank tales of his own experiences and beliefs concerning his uncertain and fluid identities with those of others who tell their stories In addition to material from academic and popular sources a few poems further illuminate the scene
