MUSINGS AND RESONANCES Syed Taffazull Hussain, 2021-11-07 The Koran is the holy book of the Muslims and in my view it is not proper to relate it to science which is built on a framework of theories that are predictive rather than fundamental. However, when reflecting or musing on its verses, I have found certain resonances with the current scientific insights about our world. Some such musings, reflections, and resonances are proffered for the interested reader. These are my thoughts and should not be construed to be anything else. They are absolutely not intended to be explanations or explications of Quranic verses. I have written translations of some verses of the Holy Quran; translations are no substitute for the original and then mentioned some scientific views about some subject. Some readers like myself may find a resonance between them; others may find none.

on Earth and the life of the Earth is whether an expanding and high consumption species like ours is sustainable Only new resources new priorities new policies and most of all new knowledge can reverse the damage that humanity is doing to our home and ourselves A sustainable human future Rhodes concludes in this eloquent sobering but ultimately optimistic book will require a sense of responsible stewardship for we are not owners of this planet we are tenants Surveying the systems large and small that govern Earth s processes and influence its changes Rhodes addresses the negative consequences of human activities for the health of its regulatory systems but offers practical suggestions as to how we might effect repairs or at least limit further damage to our home
