Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research:

Targeted Therapy of Acute Myeloid Leukemia Michael Andreeff, 2014-11-20 This book provides an unprecedented overview of Targeted Therapies for acute myeloid leukemias It aims at an almost comprehensive coverage of the diverse therapeutic strategies that have been developed during the last decade and are now being evaluated in early clinical trials Paired and authoritative chapters by leading research scientists and clinicians explain basic concepts and clinical translation of topics that include the underlying genetic and proteomic abnormalities of AML the development of novel nucleoside analogues the roles of microRNAs apoptosis regulators Bcl 2 and p53 and of critical cell signaling proteins such as PIM FLT3 Raf MEK PI3K AKT mTOR and aurora kinases Chapters on epigenetic mechanisms nuclear receptors cell surface antigens the hypoxic leukemia microenvironment stem cells and leukemia metabolism provide insights into leukemia cell vulnerabilities Cell therapies utilizing T NK and mesenchymal stem cells and progress in hematopoietic transplantation strategies round up this overview of the multi dimensional therapeutic landscape in which leukemia specialists develop treatment strategies that are expected to make leukemia history in the near future

Targeted Therapy in Translational Cancer Research

Apostolia-Maria Tsimberidou, Razelle Kurzrock, Kenneth C. Anderson, 2015-10-08 Targeted Therapy in Translational Cancer Research for the Translational Oncology series provides a comprehensive overview of recent developments in our understanding of tumor biology elucidates the roles of targets and pathways involved in carcinogenesis and describes current state of the art anticancer therapy as well as the most promising areas of translational research and targeted therapy Introduces cutting edge bench to bedside and back breakthroughs which have transformed the diagnosis prognosis and treatment of cancer Covers basic principles of targeted therapy including immunotherapy and the roles of cancer stem cells the microenvironment angiogenesis epigenetics microRNAs and functional imaging in precision medicine Summarises major advances in therapeutic management of hematologic malignancies and solid tumors using conventional therapy targeted therapy immunotherapy or novel treatment modalities

New Strategies for Reversing Cancer Therapy Resistance Yue

Du, Shengxi Chen, Xiujun Liu, Lulu Wang, 2024-04-26 Amazing anticancer therapy advancements have been made in the last decade due to tremendous innovations. Nonetheless, drug resistance remains a major challenge that limits the effectiveness of anticancer therapies, causing cancer recurrence and metastasis and being a major cause of cancer-related death. Drug resistance can be caused by complex molecular mechanisms such as gene mutations, epigenetic dysregulation, microenvironment alterations, etc. Many clinical strategies, including combination therapies and epigenetic drugs, have been used to avoid or reverse drug resistance effectively. However, the progression of cancers in patients under treatment or the lack of response of cancer patients indicate that current approaches to overcome resistance are far from sufficient and more work is needed.

Advances in Hematologic Malignancies Gamal Abdul Hamid, 2019-12-04 The book *Advances in Hematologic Malignancies* presents new knowledge of cellular disease processes, molecular pathology, and cytogenetic, epigenetic, and genomic changes that have influenced the current outlook toward hematological malignancies. This book provides a unique, practical, and concise guide that is focused on the must-know points of diagnosis, prognosis, therapeutic management, and cutting-edge clinical trial opportunities for each hematologic malignancy. *Advances in Hematologic Malignancies* is designed and organized as an essential reference source for the hematologist, hematologic oncologist, hematopathologist, and trainee.

Genomic and Personalized Medicine, 2012-10-30 *Genomic and Personalized Medicine* Second Edition, winner of a 2013 Highly Commended BMA Medical Book Award for Medicine, is a major discussion of the structure, history, and applications of the field as it emerges from the campus and lab into clinical action. As with the first edition, leading experts review the development of the new science, the current opportunities for genome-based analysis in healthcare, and the potential of genomic medicine in future healthcare. The inclusion of the latest information on diagnostic testing, population screening, disease susceptibility, and pharmacogenomics makes this work an ideal companion for the many stakeholders of genomic and personalized medicine. With advancing knowledge of the genome across and outside protein-coding regions of DNA, new comprehension of genomic variation and frequencies across populations, the elucidation of advanced strategic approaches to genomic study, and above all, in the elaboration of next-generation sequencing, genomic medicine has begun to achieve the much-vaunted transformative health outcomes of the Human Genome Project almost a decade after its official completion in April 2003. Highly Commended 2013 BMA Medical Book Award for Medicine. More than 100 chapters from leading researchers review the many impacts of genomic discoveries in clinical action, including 63 chapters new to this edition. Discusses state-of-the-art genome technologies, including population screening, novel diagnostics, and gene-based therapeutics. Wide and inclusive discussion encompasses the formidable ethical, legal, regulatory, and social challenges related to the evolving practice of genomic medicine. Clearly and beautifully illustrated with 280 color figures and many thousands of references for further reading and deeper analysis.

Drug Discovery Stories Bin Yu, Peng Zhan, 2024-10-25 Drug

Discovery Stories From Bench to Bedside presents a collection of cases on the development of highly successful pharmaceuticals. It delves into the realm of drug discovery exploring the structural biology and biological functions of the sought after targets. The book covers the identification of promising compounds, their transformation from hits to leads through meticulous optimization and the elucidation of how key compounds interact with the target in essence providing invaluable insights for drug design. Additionally, it covers essential information such as the pivotal biological and PK data of lead compounds, any noteworthy clinical results and a comprehensive overview of other candidate compounds. The field of drug discovery and development has experienced rapid evolution with numerous new drugs receiving approval each year. While several books have been published on this subject, there is a pressing need for a new book series that accurately reflects the current advancements in drug discovery. This book aims to not only cater to the drug discovery community but also engage other communities involved in chemical biology, synthetic chemistry and pharmacology. Analyzes the drug discovery stories of different blockbuster drugs. Includes the newly approved drugs. Covers key aspects related to the drug development of the drugs.

Acute Leukemias Stefan H. Faderl, Hagop M. Kantarjian, Elihu Estey, 2020-10-10. Better therapy of acute leukemias depends ultimately on better understanding of the distinction between leukemic and normal progenitor cells. This hugely important new book describes the current knowledge of acute leukemia biology and discusses new classification systems that have arisen as a result of emerging insights into pathogenesis. Estey, Faderl and Kantarjian, who all work at the respected Anderson Cancer Center in Houston, Texas, USA, examine in detail advances in the treatment of particular types of acute leukemia. Their book also covers the management of acute leukemia in general as well as the development of new therapies. This book will be extremely useful to clinicians.

Core Curriculum for Oncology Nursing - E-Book Oncology Nursing Society, Jeannine M. Brant, Diane G. Cope, Marlon Garzo Saría, 2023-06-30. NEW. Updated content throughout reflects the 2022 OCN Examination blueprint along with the latest national and international guidelines and the most current research evidence. NEW. A Myelofibrosis chapter is added to address this important cancer type and a Social Determinants of Health and Financial Toxicity chapter addresses the cost of cancer treatment and financial burden of cancer treatment on patients and families. NEW. COVID-19 related content reflects the impact of the ongoing pandemic including differential diagnoses for pulmonary symptoms and the impact of delayed cancer diagnosis and treatment. NEW. Updated emphases mirror those of the American Association of Colleges of Nursing 2021 Essentials as well as the recommendations of the 2020-2030 Future of Nursing report.

Hematology once again bridges the gap between the clinical practice of hematology and the basic foundations of science. Broken down into eight parts, this book provides readers with a comprehensive overview of Laboratory Hematology: The Normal Hematologic System, Transfusion Medicine, Disorders of Red Cells, Hemostasis and Coagulation, Benign Disorders of Leukocytes, The Spleen and/or Immunoglobulins, Hematologic Malignancies, and Transplantation. Within these sections, there is a heavy focus on the morphological exam of the peripheral blood smear, bone marrow, lymph nodes, and other tissues. With the knowledge about gene therapy and immunotherapy expanding, new up-to-date information about the process and application of these therapies is included. Likewise, the editors have completely revised material on stem cell transplantation in regards to both malignant and benign disorders, graft versus host disease, and the importance of long-term follow-up of transplantation survivors.

Precision Immunotherapy and Novel Target Discovery in Hematological Malignancy Beibei Zhang, Tuo Liu, Yu Pan, 2025-11-13

Hematological malignancies represent defying clinical conditions affecting either the lymphoid or the myeloid lineages. Targeted therapy research is developing rapidly from bench to bedside based on the continually updated disease molecular understanding and growing novel target identifications in malignancy. Patient survival expectations and clinical outcomes are closely associated with the development of precision treatments. For example, acute myeloid leukemia (AML) is a group of myeloid malignancies characterized by high heterogeneity in clinical courses and therapy responses. The emergence of new targeted agents such as FLT3/BCL2 inhibitors or immune checkpoint blockade (ICB) therapy has significantly improved the survival of a subtype of AML. In addition, inspired by the promising outcomes of CAR T therapy in certain malignancies, various new immunotherapy technologies are emerging rapidly based on neoantigens. Nevertheless, the lack of ideal targets or neoantigens seems to be one of the major stumbling blocks in the precision immunotherapy of most hematological malignancies. Currently, developed technological innovations have driven the identification of more and more malignant disease-specific novel molecules or neoantigens that arise as diagnostic biomarkers and therapeutic targets. Thus, precision targeted immunotherapy is developing as one of the most promising approaches in the battle against these hematological malignant diseases. There is no doubt that the development of novel precision diagnoses and therapeutic approaches against these novel targets or neoantigens will outline the prospective clinical applications in the future. Given the significant clinical outcomes of novel target-based immunotherapy and uncovered mechanism understanding in hematological malignancies, the research topic welcomes studies involved in the latest developments in novel target or neoantigen discoveries and utilizations, including small chemical molecular immunomodulatory drug development, vaccines, antibodies, and cell therapies from basic preclinical research to translational studies in hematological malignancies. The main goal of this research topic is to draw a clear framework within which we can see the steps that should be taken to establish and maintain effective anti-malignancy immune responses based on novel target or neoantigen-associated immunotherapeutic approaches, which are crucial for interpreting hematological malignancy.

clinical outcomes The research topic welcomes submissions of original research articles brief research reports clinical cases perspectives mini reviews and reviews concerning hematological malignancies Topics include but are not limited to 1 Novel target or neoantigen screening and discovery method development 2 Novel target or neoantigen based malignancy diagnosis 3 Novel small chemical molecular immunomodulatory drug development 4 Novel vaccine antibody development and cell immunotherapy 5 Immune escape or resistance mechanisms Please note manuscripts consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases which are not accompanied by validation independent cohort or biological validation in vitro or in vivo are out of scope for this section and will not be accepted as part of this

FAQs About Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research Books

1. Where can I buy Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.

9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Targeted Therapy Of Acute Myeloid Leukemia Current Cancer Research books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
