our bodies are damaged but immunity is not something you can see touch or feel It can fight off malicious bacteria and
viruses locate cancerous growths and even re wire our brains but sometimes our own tissues can get caught in its crossfire
with catastrophic consequences Humans may be the most disease ridden animals on the planet Professor John Trowsdale
shows how the immune system protects us and how our bodies invest huge resources to keep it running Immunity influences
how we age and controls how we learn to fight off recurring diseases and how our bodies respond to chronic conditions such
