Directors View their Roles and Responsibilities Philip Stiles,Bernard Taylor,2001-03-29 Boards of directors are coming under increasing scrutiny in terms of their contribution in monitoring and controlling management particularly in the wake of high profile corporate frauds and failures and also their potential to add value to organizational performance through

involvement in the strategy process and through building relationships with key investors Despite the importance of these issues not only to organizations but also arguably to national competitiveness the nature of board activity remains largely a black box clouded by prescriptions prejudices and half truths This book responds to calls for greater scrutiny of boards of directors with an in depth examination of directors of UK organizations drawing on the accounts of directors themselves as to their roles influence and the potential and limits to their power Much work on boards of directors has labelled the board as a rubber stamp for dominant management and non executive directors in particular have been variously described as poodles pet rocks or parsley on the fish Such accounts are rooted in assumptions of board activity that are essentially adversarial in nature and that the solution to the problem of reconciling the interests of managers with those of shareholders is to increase the checks and balances available to the board of directors The findings of this study show that boards in many cases are far more than passive rubber stamps for management and that non executives are encouraged to act as trusted advisers to the executives and the chief executive rather than solely monitors of executive activity Boards are important mechanisms in maintaining the strategic framework of the organization through setting the boundaries of organizational activity The potential of the board members in particular the non executives to fulfil such a mandate depends on a number of factors including ability willingness to engage with the organizational issues and the degree of knowledge they have relevant to the host firm Above all the degree of trust built between members of the board and between the board and key external constituencies is at the heart of effective board behaviour
