Taking Care Of Youth And The Generations:

Taking Care of Youth and the Generations Bernard Stiegler, 2010 The book presents a powerful reminder of adults responsibility for the development of long term attention and thus of maturity in children particularly in the face of the techniques of attention destruction practiced by the programming industries Bernard Stiegler Bart Buseyne, Georgios Tsagdis, Paul Willemarck, 2024-01-25 Honouring the memory of the late Bernard Stiegler this edited collection presents a broad spectrum of contributions that provide a complex and coherently articulated image of Stiegler's thought which reached beyond the boundaries of academic artistic and experimental techno scientific enclaves where it had been originally received Stiegler's philosophical work encompassed theorization social diagnosis planning practical and territorial experimentation politics and aesthetics In its wake the essays in this volume celebrate and explore the wealth of this multi dimensional legacy They examine the conditions of human life in general its foundational intermittence and carry forward Stiegler's post phenomenological unfolding of the distinctive spatio temporalities that weave together the epoch we call present Engaging closely with Stiegler's original impetus for the creation of technologies of care as well as of communities of knowledge and artistic practice **Feminism, Digital Culture and the Politics of Transmission** Deborah Withers, 2015-10-02 Feminism Digital Culture and the Politics of Transmission argues that despite the prevalence of generational narratives within feminism the technical processes through which knowledge is transmitted across generations remain unexplored Taking Bernard Stiegler's concept of the already there as its starting point the book considers how the politics of transmission operates within digital culture It argues that it is necessary to re orient feminism's political project within what is already there so that it may respond to an emergent feminist tradition Grounded in the author's work collecting and interpreting the music making heritage of the UK Women's Liberation Movement it explores how digital technologies have enabled impassioned amateurs to make archives within the first decade of the 21st century The book reflects on what is technically and politically at stake in the organization and transmission of digital artifacts and explores what happens to feminist cultural heritage when circuits shut down stall or become diverted **The Assemblage Brain** Tony D. Sampson, 2016-12-13 Once upon a time neuroscience was born A dazzling array of neurotechnologies emerged that according to popular belief have finally begun to unlock the secrets of the brain But as the brain sciences now extend into all corners of cultural social political and economic life a yet newer world has taken shape neuroculture which goes further than ever before to tackle the profound ethical implications we face in consequence The Assemblage Brain unveils a major new concept of sense making one that challenges conventional scientific and philosophical understandings of the brain Drawing on Deleuze and Guattari Tony D Sampson calls for a radical critical theory that operates in the interferences between philosophy science art and politics From this novel perspective the book is structured around two questions What can be done to a brain and What can a brain do Sampson examines the rise of neuroeconomics in informing significant developments in computer work marketing and the

neuropharmaceutical control of inattentiveness in the classroom Moving beyond the neurocapitalist framework he then reestablishes a place for proto subjectivity in which biological and cultural distinctions are reintegrated in an understanding of the brain as an assemblage The Assemblage Brain unravels the conventional image of thought that underpins many scientific and philosophical accounts of how sense is produced providing a new view of our current time in which capitalism and the neurosciences endeavor to colonize the brain

States of Shock Bernard Stiegler, 2015-02-18 In 1944 Horkheimer and Adorno warned that industrial society turns reason into rationalization and Polanyi warned of the dangers of the self regulating market but today argues Stiegler this regression of reason has led to societies dominated by unreason stupidity and madness However philosophy in the second half of the twentieth century abandoned the critique of political economy and poststructuralism left its heirs helpless and disarmed in face of the reign of stupidity and an economic crisis of global proportions New theories and concepts are required today to think through these issues The thinkers of poststructuralism Lyotard Deleuze Derrida must be re read as must the sources of their thought Hegel and Marx But we must also take account of Naomi Klein s critique of Milton Friedman and the Chicago School and her account of the shock doctrine In fact argues Stiegler a permanent state of shock has prevailed since the beginning of the industrial revolution intensified by the creative destruction brought about by the consumerist model The result has been a capitalism that destroys desire and reason and in which every institution is

undermined above all those institutions that are the products par excellence of the Enlightenment the education system and universities Through a powerful critique of thinkers from Marx to Derrida Stiegler develops new conceptual weapons to fight this destruction He argues that schools and universities must themselves be transformed new educational institutions must be developed both to take account of the dangers of digitization and the internet and to enable us to take advantage of the new opportunities they make available
