Database and Expert Systems Applications Abdelkader Hameurlain, Rosine Cicchetti, Roland Traunmüller, 2003-08-02
th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 2 6
2002 at the Universit Aix Marseille II France The quickly growing field of information systems required the establishment of
more specialized discussion platforms the DaWaK conference EC Web conference eGOV conference and DEXA workshops
and there were held in parallel with DEXA also in Aix en Provence The resulting book was prepared with great effort Starting
with the preparation of submitted papers the papers went through the reviewing process The accepted papers were revised
to final versions by their authors and arranged to the conference program This year 241 papers were submitted and our
thanks go to all who have contributed The program committee and the supporting reviewers produced altogether about 730
referee reports on average three reports per paper and selected 89 papers for presentation The papers presented here
encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster
a vast part of applied computer science was covered In this way DEXA has blazed the trail At this point we would like to
acknowledge to all institutions which actively supported this conference and made it possible These are IUT Universit Aix
Marseille II FAW DEXA Association the Austrian Computer Society and Microsoft Research Fuzzy Set Theory—and Its
Applications Hans-Jürgen Zimmermann, 2013-04-17 Fuzzy Set Theory And Its Applications Third Edition is a textbook for
courses in fuzzy set theory It can also be used as an introduction to the subject The character of a textbook is balanced with
the dynamic nature of the research in the field by including many useful references to develop a deeper understanding
among interested readers The book updates the research agenda which has witnessed profound and startling advances since
its inception some 30 years ago with chapters on possibility theory fuzzy logic and approximate reasoning expert systems
fuzzy control fuzzy data analysis decision making and fuzzy set models in operations research All chapters have been updated
Exercises are included **Scientific and Technical Aerospace Reports**, 1995 **Introduction to Solar Radio
Astronomy and Radio Physics** A. Krüger, 2012-12-06 1 1 Short History of Solar Radio Astronomy Since its birth in the
forties of our century solar radio astronomy has grown into an extensive scientific branch comprising a number of quite
different topics covering technical sciences astrophysics plasma physics solar terrestrial physics and other disciplines
Historically the story of radio astronomy goes back to the times of James Clerk Maxwell whose well known phenomenological
electromagnetic field equations have become the basis of present time radio physics As a direct consequence of these
equations Maxwell was able to prognosticate the existence of radio waves which fifteen years later were experimentally
detected by the famous work of Heinrich Hertz 1887 88 However all attempts to detect radio waves from cosmic objects
failed until 1932 which was mainly due to the early stage of development of receiving techniques and the as yet missing
knowledge of the existence of a screening ionosphere which was detected in 1925 Therefore famous inventors like Thomas

Edison and A E Kennelly as well as Sir Oliver Lodge were unsuccessful in receiving any radio emission from the Sun or other extraterrestrial sources Another hindering point was that nobody could a priori expect that solar radio emission should have something to do with solar activity so that unfortunately by chance some experiments were carried out just at periods of low solar activity This was also why Karl Guthe Jansky at the birth of radio astronomy detected galactic radio waves but no emission from the Sun

Knowledge Management Klaus North,Gita Kumta,2025-05-05 This textbook on knowledge management draws on the authors more than thirty years of research teaching and consulting experience The first edition of this book brought together European Asian and American perspectives on knowledge based value creation The second edition included digital transformation s impact on knowledge work and management This third edition features substantial updates to all chapters reflecting the implications of digital technology on knowledge work and knowledge management with special reference to Artificial Intelligence In particular it addresses three new topics blending human and machine intelligence critical thinking and ethical use of knowledge and managing knowledge for sustainable development The book is intended not only for academic education but also as an essential guide for managers consultants trainers coaches and all those engaged in business public administration or non profit work who are interested in learning about organizations in a knowledge economy Given its wealth of case studies examples questions exercises and easy to use knowledge management tools it offers a true compendium for understanding and implementing knowledge management initiatives

Systems Research II Kyoichi Kijima,Junichi Iijima,Ryo Sato,Hiroshi Deguchi,Bumpei Nakano,2022-05-10 This book is in honor of Yasuhiko Takahara a first class researcher who has been active for some 50 years at the global level in systems research Researchers and practitioners from Japan and other countries who have been influenced by Takahara have come together from far and wide to contribute their major research masterpieces in the field of systems research in the broadest sense While the roots of Takahara s systems research are in general systems theory and systems control theory he developed his research and teaching in diverse directions such as management information science engineering social simulation and systems thinking As a result many of the researchers and practitioners he supervised or influenced have established their own positions and are now active around the world in a wide range of systems research Volume II is a collection of their masterpieces or representative works in the fields of systems management theory and practice
