Introduction of the interviewer and interview objective

- Introduction
Hello, welcome to the interview. Thank you for making time to do this interview with me.
- Research objective
I am doing this interview with you because our group wants to find out the image and perception you (25-30, single, working and have been or want to go to Nepal) have of Nepal as holiday/travel destination. We want to know more about your image and perception, because you are apart of our target group.
- Duration
The duration of this interview is going to be around 30-45 minutes, this all depends on how the interview goes. It would be very delightful if you tried to answer my questions with as much detail as possible. Because we can use all the information we get.
- Anonymity
Just to be clear, you are okay with me recording this interview, and me writing down your answers? We need to record our interview so we can listen back to the audio and write down the entire interview.
- Recording
Also, to be clear this information is only for our research and will not be shared anywhere. It is strictly for us and nothing else will be done with it, other than my group using it for our research.
- Questions of respondent
Now, before we begin do you have any questions? Anything you would like to be enlightened about before we start the interview.

Idea-Based Learning Edmund J. Hansen,2023-07-03 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments
