*Directory of Online Databases* ,1992      *Medieval Horizons* Ian Mortimer,2023-02-23 The essential introduction to the Middle Ages by the author of The Time Traveller s Guide series the most remarkable medieval historian of our time The Times UK We tend to think of the Middle Ages as a dark backward and unchanging time characterized by violence ignorance and superstition By contrast we believe progress arose from science and technological innovation and that inventions of recent centuries created the modern world But as Ian Mortimer shows in this fascinating book we couldn t be more wrong In this revelatory history Mortimer shows how people s horizons their knowledge experience and understanding of the world were utterly transformed between 1000 and 1600 marking the transition from a warrior led society to that of Shakespeare Medieval Horizons sheds light on the enormous cultural changes that took place from literacy to living standards inequality and even the developing sense of self Mortimer demonstrates why this was a revolutionary age of fundamental importance in the development of the Western world      Extreme Money Satyajit Das,2011-11-02 A definitive cultural history of high

finance from one of the industry s most astute analysts Written by internationally respected financial expert Satyajit Das Extreme Money shows how real engineering was replaced by financial engineering in the twentieth century enabling vast fortunes to be made not from goods produced or services performed but from supplying and trading money Extreme Money focuses on this eviscerated reality the monetary shadow of real things and what it means today The high levels of economic growth and the wealth that inevitably follows driven by cheap debt financial engineering and speculation were never sustainable and the last few years have borne this out The book shows how policy makers and regulators unknowingly underwrote the risks substantially reducing their ability to control economic outcomes Extreme money concentrated economic power wealth and risk in the hands of a small community of gifted dynamic financiers largely outside the regulatory purview and the democratic process and there s no going back Explains the extreme money games via private equity securitization derivatives hedge funds and other means invented by the elite financiers of last century Raises deeper questions about the nature of the economic structure and assumptions about ongoing financially engineered prosperity that readers politicians and financial figures need to be asking The book is timed to coincide with the next phase of the financial crisis as prospects of recovery diminish and the global economy becomes mired in a Western version of Japan s Lost Decade Ambitious in scope and coverage the book is the indispensable in depth guide to the age of modern money An age defined by extremes of financial behavior      **Papers in ITJEMAST 10(4) 2019** , ITJEMAST V10 4 2019 International Transaction
