Lead Generation Jörg Holenz, 2016-03-16 In this comprehensive two volume resource on the topic senior lead generation medicinal chemists present a coherent view of the current methods and strategies in industrial and academic lead generation This is the first book to combine both standard and innovative approaches in comparable breadth and depth including several recent successful lead generation case studies published here for the first time Beginning with a general discussion of the underlying principles and strategies individual lead generation approaches are described in detail highlighting their

strengths and weaknesses along with all relevant bordering disciplines like e.g. target identification and validation, predictive methods, molecular recognition or lead quality matrices. Novel lead generation approaches for challenging targets like DNA encoded library screening or chemical biology approaches are treated here side by side with established methods as high throughput and affinity screening, knowledge or fragment based lead generation and collaborative approaches. Within the entire book a very strong focus is given to highlight the application of the presented methods so that the reader will be able to learn from real life examples. The final part of the book presents several lead generation case studies taken from different therapeutic fields including diabetes, cardiovascular and respiratory diseases, neuroscience, infection and tropical diseases. Classroom X-Factor: The Power of Body Language and Non-verbal Communication in Teaching John White, John Gardner, 2013-03-01. Why is it that some teachers have a kind of magical charisma and charm which sets them apart from their peers? This book gives us a fresh and exciting answer: They have the classroom X Factor. White and Gardner's gripping text *The Classroom X Factor* examines the notion of having what the public has come to call the X Factor from the perspective of the teacher, offering fascinating insights into the use of non-verbal communication in the classroom. Using classroom and curricular examples, this book sets out to show how both trainee and practising teachers can identify their own X Factor in order to help transform their perspectives and perceptions of themselves during the live act of teaching. The book demonstrates how teachers can transform the way in which they connect with their students whilst also creating meaningful and potent learning experiences for them. White and Gardner show that by following simple methods borrowed from psychology and cognitive science, teachers can develop their own X Factor and in so doing increase their enjoyment and efficacy as professionals. The techniques described include some of the following: Facial and vocal expression, Gesture and body language, Eye contact and smiling, Teacher attire, colour and the use of space, Nonverbal communication and pedagogical approaches. In addition, the book provides a section containing fictional stories that aim to contextualise the findings detailed throughout the text. The inclusion of chapter summaries, questions aimed at identifying the reader's own X Factor, lesson exemplars and a user-friendly self-evaluation framework all work together to make the book a stimulating and easy read where reflective learning and the practical application of classroom techniques are the order of the day. This comprehensive guide to developing the classroom X Factor within you will be of value to teaching and learning and is of immense use to both practising and student teachers and to schools seeking to develop models of reflective practice. It will also be of interest to curriculum and assessment agencies, policy makers, academics and others whose roles involve the design, provision, support and evaluation of teachers' efficacy in the classroom. **Billboard**, 2011-07-02.
