Information, Knowledge, and Technology for Teaching and Research in Africa Dennis Ocholla, Omwoyo Bosire Onyancha, Aderonke Olaitan Adesina, 2024-08-27 This book focuses on information seeking and the knowledge economy for teaching and research in Africa The book first explores the evolution and current state of information seeking behavior research demonstrating its importance in informing practice policy and design of information systems Despite the informal sector's substantial contributions to the national economy in Uganda there is a lack of studies delving into its information needs as well as an information gap in government NGOs and other stakeholders The book proposes that an appropriate information behavior model for information poor communities such as informal entrepreneurs must be grounded on oral traditions and indigenous knowledge and should be sensitive to poverty infrastructure and illiteracy The negative impact of the lack of financial literacy skills for women entrepreneurs is investigated and solutions for this problem are suggested including regular assessments of women entrepreneurs financial literacy skills and the introduction of training courses The role of academic libraries in universities library services for students with disabilities and accessibility of library services to students with disabilities is discussed and theoretical models for enhancing service in academic libraries are presented The book highlights the specific challenges and opportunities related to information literacy for secondary schools and concludes by examining the rapid changes in library and information science research in South Africa Encyclopedia of Production and Manufacturing Management Paul M. Swamidass, 2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification. The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these Automotive Product Development Vivek D. Bhise, 2017-05-08 This book is about how to ongoing changes in the field develop future automotive products by applying the latest methodologies based on a systems engineering approach and by taking into account many issues facing the auto industry such as meeting government safety emissions and fuel economy regulations incorporating advances in new technology applications in structural materials power trains vehicle lighting systems displays and telematics and satisfying the very demanding customer It is financially disastrous for any automotive company to create a vehicle that very few people want To design an automotive product that will be successful in the marketplace requires carefully orchestrated teamwork of experts from many disciplines substantial amount of resources and application of proven techniques at the right time during the product development process Automotive Product Development A Systems Engineering Implementation is intended for company management personnel and graduate students in engineering business management and other disciplines associated with the development of automotive and other complex **Ergonomics in the Automotive Design Process** Vivek D. Bhise, 2024-07-10 Automotive design continues to products evolve at a rapid pace As electric cars become ever more commonplace on the roads to the advent of the driverless vehicle understanding the ergonomics behind automotive engineering becomes ever more paramount Vehicle attributes must be considered early during the new vehicle development program by coordinated work of multi disciplinary teams to begin creating vehicle specifications and development of vehicle attribute requirements In Ergonomics in the Automotive Design Process Advanced Topics Measurements Modeling and Research experienced automotive engineer Vivek D Bhise investigates the advanced procedures and considerations to develop an ergonomic vehicle This book covers the entire range of ergonomics issues involved in designing a car or truck and offers evaluation techniques to avoid costly mistakes and assure

high customer satisfaction This book delves into driver performance electric vehicles EVs interfaces new technology and costs and benefits plus a lot more Evaluation and measurement are covered in essential detail and the title has been brought right up to date with chapters on engineering design during automotive product development vehicle evaluation verification and validation and product liability litigations and ergonomic considerations. This book is designed to allow the reader to develop a more comprehensive knowledge of issues facing the developers of automotive products and delivers methods to manage communication coordination and integration processes Delivering a toolkit that will allow you to implement systems engineering to minimize the risks of delays and cost overruns it delivers a framework that will allow you to create the right product for your customers The reader will therefore develop a knowledge of future in vehicle devices that are easy to program and use safe cheap to manufacture and assemble and eco friendly This title is an ideal read for students and practitioners of ergonomics human factors automotive design civil engineering product design work design and mechanical engineering This title is an ideal read for students and practitioners of ergonomics human factors automotive design civil engineering product design work design and mechanical engineering Procurement Compliance Behaviour Abdalla Fahad Mohamed, Samson Wandera Maata, Abdul Karim Mansaray, Akwalu Ezekiel Kiriinya, 2023-06-27 TOPICS IN THE BOOK Effects of Selected Lean Management Practices on Financial Performance of Private Hospitals in Mombasa County Kenya Role of Third Party Logistics Services on Supply Chain Performance in Distribution Sector in Kenya A Case of Bollore Transport Logistics Kenya Limited Public Procurement Compliance Behavior and Its Effect on Quality Service Delivery A Case Study of the Electricity Company of Ghana ECG The Effect of Procurement Compliance Behavior on Quality of Service Delivery A Case Study of the Electricity Company of Ghana ECG Influence of Collaborative Planning on Performance of Pharmaceutical Firms Six Sigma Implementation In Service Sector Dr Sujaendra Swami P, PERSON CENTRED CARE THEORY in Kenva **AND PRACTICES** Dr. Zuber M. Shaikh, 2021-07-28 In this book the theory and practices of Person Centered Care has been elaborated in detail Handbook of Aseptic Processing and Packaging Jairus R. D. David, Pablo M. Coronel, Josip Simunovic, 2022-09-09 Nine years have passed since the second edition of the Handbook of Aseptic Processing and Packaging was published Significant changes have taken place in several aseptic processing and packaging areas These include aseptic filling of plant based beverages for non refrigerated shelf stable formats for longer shelf life and sustainable packaging along with cost of environmental benefits to leverage savings on energy and carbon footprint In addition insight into safe processing of particulates using two and three dimensional thermal processing followed by prompt cooling is provided In the third edition the editors have compiled contemporary topics with information synthesized from internationally recognized authorities in their fields In addition to updated information 12 new chapters have been added in this latest release with content on Design of the aseptic processing system and thermal processing Thermal process equipment and technology for heating and cooling Flow and residence time distribution RTD for homogeneous and heterogeneous fluids Thermal process

and optimization of aseptic processing containing solid particulates Aseptic filling and packaging equipment for retail products and food service Design of facility infrastructure and utilities Cleaning and sanitization for aseptic processing and packaging operations Microbiology of aseptically processed and packaged products Risk based analyses and methodologies Establishment of validated state for aseptic processing and packaging systems Quality and food safety management systems for aseptic and extended shelf life ESL manufacturing Computational and numerical models and simulations for aseptic processing Also there are seven new appendices on original patents examples of typical thermal process calculations and particulate studies single particle and multiple type particles and Food and Drug Administration FDA filing The three editors and 22 contributors to this volume have more than 250 years of combined experience encompassing manufacturing innovation in processing and packaging R D quality assurance and compliance Their insight provides a comprehensive update on this rapidly developing leading edge technology for the food processing industry The future of aseptic processing and packaging of foods and beverages will be driven by customer facing convenience and taste use of current and new premium clean label natural ingredients use of multifactorial preservation or hurdle technology for maximizing product quality and sustainable packaging with claims and messaging
