The history, development, facilities, conditions, technology, classification systems, and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described, literacy levels, reading cultures, languages, and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

International Handbook of Middle Level Education Theory, Research, and Policy David C. Virtue, 2019-08-30. The International Handbook of Middle Level Education Theory, Research, and Policy is a landmark resource for researchers, graduate students, policy makers, and practitioners who work in middle level education and associated fields of study. The volume provides an overview of the current state of middle level education theory, research, and policy, offers analysis and critique of the extant literature in the field, and maps new directions for research and theory development in middle level education. The handbook meets a pressing need in the field for a resource that is comprehensive in its treatment of middle level research and international in scope. Chapter authors provide rationales for middle level education research and definitions of the field, discuss philosophical approaches and underpinnings for middle level education research, describe and critique frameworks for quality in middle level education, review research about young adolescent learners, middle level school programming, and educator preparation, and analyze public policies affecting middle level education at national, regional, and local levels.

Smart Economy in Smart African Cities Gora Mboup, Banji Oyelaran-Oyeyinka, 2019-02-21. This book highlights the use of information and communication technology (ICT) infrastructures in order to develop smart cities and produce smart economies in Africa. It discusses a robust set of concepts including smart planning, smart infrastructure development, smart economic development, smart environmental sustainability, smart social development, resilience, and smart peace and security in several African cities. By drawing on the accumulated knowledge on various conditions that make cities smart, green, livable, and healthy, it helps in the planning, design, and management of African urbanization. In turn, it fosters the development of e-commerce, e-education, e-governance, etc. The rapid development of ICT infrastructures facilitates the creation of smart economies in digitally served cities and towns through smart urban planning, smart infrastructures, smart land tenure, and smart urban policies. In the long term, this can reduce emissions of CO₂, promote the creation of low-carbon cities, reduce land degradation, and promote biodiversity.
