Gonzalez Briseno,2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used

by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives **Tourism Enterprise** David Leslie, 2014-11-26

The Ethics of Cultural Heritage Tracy Ireland, John Schofield, 2014-11-01 It is widely acknowledged that all archaeological research is embedded within cultural political and economic contexts and that all archaeological research falls under the heading heritage Most archaeologists now work in museums and other cultural institutions government agencies non government organisations and private sector companies and this diversity ensures that debates continue to proliferate about what constitutes appropriate professional ethics within these related and relevant contexts Discussions about the ethics of cultural heritage in the 20th century focused on standards of professionalism stewardship responsibilities to stakeholders and on establishing public trust in the authenticity of the outcomes of the heritage process This volume builds on recent approaches that move away from treating ethics as responsibilities to external domains and to the discipline and which seek to ensure ethics are integral to all heritage theory practice and methods The chapters in this collection chart a departure from the tradition of external heritage ethics towards a broader approach underpinned by the turn to human rights issues of social justice and the political economy of heritage conceptualising ethical responsibilities not as pertaining to the past but to a future focused domain of social action
